Explanation of Symbols:
The page number on which an article begins is listed at the end of that article's title. An article may appear under more than one heading.
Author names are listed alphabetically. Numbers listed after each name are the page numbers of the article(s) on which that name appears.

AADR (see IADR/AADR)

ABNORMALITIES
Diphenylhydantoin affects glycosaminoglycans and collagen production by human fibroblasts from cleft palate patients. Bosi, G., *et al.*, 1613

ABORIGINES
Anthropology, tooth wear, and occlusion *ab origine*. Young, W.G., 1860

ABRASION (see Tooth Abrasion)

ABSTRACTS
AADR Abstracts, 106
Divisional Abstracts, 1101
Errata, 1948
IADR Abstracts, 632

ACETIC ACID
Reactivity of fluoride-containing calcium aluminosilicate glasses used in dental glass-ionomer cements. De Maeyer, E.A.P., *et al.*, 2005

ACETYLCHOLINE
Cyclic ADP-ribose induces Ca^{2+} release from caffeine-insensitive Ca^{2+} pools in canine salivary gland cells. Yamaki, H., *et al.*, 1807

ACRYLIC RESINS
Distortion behavior of heat-activated acrylic denture-base resin in conventional and long, low-temperature processing methods. Kawara, M., *et al.*, 1446

ACTINOMYCES
Agglutinin and acidic proline-rich protein receptor patterns may modulate bacterial adherence and colonization on tooth surfaces. Carlén, A., *et al.*, 81

ADENOMATOUS POLYPOSIS COLI
Adenomatous polyposis coli protein is expressed in alternate stages of the ameloblast life cycle. Wang, M., *et al.*, 1979

ADENOSINE DIPHOSPHATE RIBOSE
Cyclic ADP-ribose induces Ca^{2+} release from caffeine-insensitive Ca^{2+} pools in canine salivary gland cells. Yamaki, H., *et al.*, 1807

ADENOSINE TRIPHOSPHATE
In situ phosphorylation of bone and dentin proteins by the casein kinase II-like enzyme. Suzuki, Y., *et al.*, 1799

ADENOSINETRIPHOSPHATASE
Carbachol-induced oxygen consumption in slices from developing rat submandibular and parotid glands. Stojić, D., 1647

ADHESION (see Bacterial Adhesion; Cell Adhesion)

ADHESIVES
TEM study of two water-based adhesive systems bonded to dry and wet dentin, A. Van Meerbeek, B., *et al.*, 50

AGED
Association between water-borne fluoride and bone mineral density in older adults. Phipps, K.R., *et al.*, 1739

AGGLUTININS
Agglutinin and acidic proline-rich protein receptor patterns may modulate bacterial adherence and colonization on tooth surfaces. Carlén, A., *et al.*, 81

ALGORITHMS
Automatic on-line one-channel recognition of masseter activity. Gallo, L.M., *et al.*, 1539

ALKALINE PHOSPHATASE
Autoregulation of periodontal ligament cell phenotype and functions by transforming growth factor-β1. Brady, T.A., *et al.*, 1779
Flow cytometry analysis of gingival and periodontal ligament cells. Kuru, L., *et al.*, 555
In situ phosphorylation of bone and dentin proteins by the casein kinase II-like enzyme. Suzuki, Y., *et al.*, 1799
Serum or growth factor deprivation induces the expression of alkaline phosphatase in human gingival fibroblasts. Abe, T., *et al.*, 1700

ALLIGATORS AND CROCODILES
Relationship between growth and the pattern of tooth initiation in alligator embryos. Osborn, J.W., 1730

ALLOYS, DENTAL (see Dental Alloys)

ALUMINUM SILICATES
Reactivity of fluoride-containing calcium aluminosilicate glasses used in dental glass-ionomer cements. De Maeyer, E.A.P., *et al.*, 2005

ALVEOLAR BONE
Attachment formation following replantation of cultured cells into periodontal defects—a study in minipigs. Lang, H., *et al.*, 393
Expression of transforming growth factor-beta 1 (TGF-β1) in the developing periodontium of rats. Gao, J., *et al.*, 1708
Inhibition of tooth eruption in the rat by a bisphosphonate. Grier, R.L. and Wise, G.E., 8

ALVEOLAR BONE LOSS
Continuous administration of basic fibroblast growth factor (FGF-2) accelerates bone induction on rat calvaria—an application of a new drug delivery system. Kimoto, T., *et al.*, 1965

AMELOBLASTS
Adenomatous polyposis coli protein is expressed in alternate stages of the ameloblast life cycle. Wang, M., *et al.*, 1979
Enamelysin (matrix metalloproteinase-20): localization in the developing tooth and effects of pH and calcium on amelogenin hydrolysis. Fukae, M., *et al.*, 1580
Laminin γ2 expression is developmentally regulated during murine tooth morphogenesis and is intense in ameloblasts. Sahlberg, C., *et al.*, 1589
Protein-to-protein interactions: criteria defining the assembly of the enamel organ matrix. Paine, M.L., *et al.*, 496

AMELOGENESIS
Adenomatous polyposis coli protein is expressed in alternate stages of the ameloblast life cycle. Wang, M., *et al.*, 1979
Cloning, characterization, and tissue expression pattern of mouse tuftelin cDNA. MacDougall, M., *et al.*, 1970
Enamelysin (matrix metalloproteinase-20): localization in the developing tooth and effects of pH and calcium on amelogenin hydrolysis. Fukae, M., *et al.*, 1580
Quantitative analysis of amelogenin solubility. Tan, J., *et al.*, 1388

AMINO ACID SEQUENCE
cDNA cloning of S100 calcium-binding proteins from bovine periodontal ligament and their expression in oral tissues. Duarte, W.R., *et al.*, 1694
Cloning, characterization, and tissue expression pattern of mouse tuftelin cDNA. MacDougall, M., *et al.*, 1970
Quantitative analysis of amelogenin solubility. Tan, J., *et al.*, 1388
RGD peptides regulate the specific adhesion scheme of osteoblasts to hydroxyapatite but not to titanium. Okamoto, K., *et al.*, 481
Synthetic integrin-binding peptides promote adhesion and proliferation of human periodontal ligament cells *in vitro*.

Adenomatous polyposis coli protein is expressed in alternate stages of the ameloblast life cycle. Wang, M., *et al.*, 1979
Cloning, characterization, and tissue expression pattern of mouse tuftelin cDNA. MacDougall, M., *et al.*, 1970
Enamelysin (matrix metalloproteinase-20): localization in the developing tooth and effects of pH and calcium on amelogenin hydrolysis. Fukae, M., *et al.*, 1580
Quantitative analysis of amelogenin solubility. Tan, J., *et al.*, 1388

AMINO ACID SEQUENCE
cDNA cloning of S100 calcium-binding proteins from bovine periodontal ligament and their expression in oral tissues. Duarte, W.R., *et al.*, 1694
Cloning, characterization, and tissue expression pattern of mouse tuftelin cDNA. MacDougall, M., *et al.*, 1970
Quantitative analysis of amelogenin solubility. Tan, J., *et al.*, 1388
RGD peptides regulate the specific adhesion scheme of osteoblasts to hydroxyapatite but not to titanium. Okamoto, K., *et al.*, 481
Synthetic integrin-binding peptides promote adhesion and proliferation of human periodontal ligament cells *in vitro*.

Grzesik, W.J., *et al.*, 1606

AMINO ACIDS
Effects of N-methacryloyl amino acid applications on hybrid layer formation at the interface of intertubular dentin. Suzuki, K., *et al.*, 1881
Modification of amino acid residues in carious dentin matrix. Kleter, G.A., *et al.*, 488

AMYGDALOID BODY
Expression of fos in the fat forebrain following experimental tooth movement. Yamashiro, T., *et al.*, 1920

ANESTHESIA, LOCAL
Carl Koller: mankind's greatest benefactor? the story of local anesthesia. Leonard, M., 535

ANTHROPOLOGY
Anthropology, tooth wear, and occlusion *ab origine*. Young, W.G., 1860

ANTI-HIV AGENTS
Submandibular salivary proteases: lack of a role in anti-HIV activity. Kennedy, S., *et al.*, 1515

ANTI-INFLAMMATORY AGENTS, NON-STEROIDAL
Pharmacokinetic and safety evaluations of ketoprofen gels in subjects with adult periodontitis. Lawrence, H.P., *et al.*, 1904

ANTIBODIES, BACTERIAL
Longitudinal analysis of the association of human salivary antimicrobial agents with caries increment and cariogenic micro-organisms: a two-year cohort study. Kirstilä V., *et al.*, 73

ANTIGEN-ANTIBODY COMPLEX
Activation of the immune system and systemic immune-complex deposits in Brown Norway rats with dental amalgam restorations. Hultman, P., *et al.*, 1415

ANTIGENS
Localization of estrogen-receptor-related antigen in human odontoblasts. Hietala, E.-L., *et al.*, 1384

ANTIMICROBIALS
Longitudinal analysis of the association of human salivary antimicrobial agents with caries increment and cariogenic micro-organisms: a two-year cohort study. Kirstilä, V., *et al.*, 73

ANXIETY (see Dental Anxiety)

APATITES
Potassium is involved in apatite biomineralization. Wiesmann, H.-P., *et al.*, 1654

APOMORPHINE
Effects of dopaminergic drugs, occlusal disharmonies, and chronic stress on non-functional masticatory activity in the rat, assessed by incisal attrition. Gómez, F.M., *et al.*, 1454

APOPTOSIS
Serum or growth factor deprivation induces the expression of alkaline phosphatase in human gingival fibroblasts. Abe, T., *et al.*, 1700

ARGININE-GLYCINE-ASPARTIC ACID PEPTIDES
RGD peptides regulate the specific adhesion scheme of osteoblasts to hydroxyapatite but not to titanium. Okamoto, K., *et al.*, 481
Synthetic integrin-binding peptides promote adhesion and proliferation of human periodontal ligament cells *in vitro*. Grzesik, W.J., *et al.*, 1606

AUSTRALIA
Anthropology, tooth wear, and occlusion *ab origine*. Young, W.G., 1860

AUTOIMMUNE DISEASES
Activation of the immune system and systemic immune-complex deposits in Brown Norway rats with dental amalgam restorations. Hultman, P., *et al.*, 1415

AUTONOMIC NERVOUS SYSTEM
Emotional responses evoked by dental odors: an evaluation from autonomic parameters. Robin, O., *et al.*, 1638

AUTORADIOGRAPHY
Circadian rhythms in the incorporation and secretion of ^{3}H-proline by odontoblasts in relation to incremental lines in rat dentin. Ohtsuka, M., *et al.*, 1889

AXONS
Alterations in ultrastructural localization of growth-associated protein-43 (GAP-43) in periodontal Ruffini endings of rat molars during experimental tooth movement. Kobayashi, H., *et al.*, 503

B-LYMPHOCYTES
Cytokine profiles of cells extracted from humans with periodontal disease. Gemmell, E. and Seymour, G.J., 16

BACTERIA
Activation and function of host matrix metalloproteinases in dentin matrix breakdown in caries lesions, The. Tjäderhane, L., *et al.*, 1622
Commensal communism and the oral cavity. Henderson, B. and Wilson, M., 1674
Oral streptococci...products of their environment. Burne, R.A., 445

BACTERIAL ADHESION
Agglutinin and acidic proline-rich protein receptor patterns may modulate bacterial adherence and colonization on tooth surfaces. Carlén, A., *et al.*, 81
Colonization with mutans streptococci and lactobacilli and the caries experience of children after the age of five. Straetemans, M.M.E., *et al.*, 1851
Oral streptococci...products of their environment. Burne, R.A., 445

BASAL LAMINA
(see Basement Membrane)

BASE SEQUENCE
Purification, characterization, and cloning of enamel matrix serine proteinase 1. Simmer, J.P., *et al.*, 377

BASEMENT MEMBRANE
Epithelium-tooth interface—a basal lamina rich in laminin-5 and lacking other known laminin isoforms, The. Hormia, M., *et al.*, 1479
Laminin γ2 expression is developmentally regulated during murine tooth morphogenesis and is intense in ameloblasts. Sahlberg, C., *et al.*, 1589

BIBBY, BASIL GLOVER
In memoriam, 1100

BIOFILMS
Oral streptococci...products of their environment. Burne, R.A., 445

BIOLOGICAL AVAILABILITY
Pharmacokinetic and safety evaluations of ketoprofen gels in subjects with adult periodontitis. Lawrence, H.P., *et al.*, 1904

BIOMECHANICS
Loading of a unilateral temporomandibular joint prosthesis: a three-dimensional mathematical study. van Loon, J.-P., *et al.*, 1939

BISPHOSPHONATES
(see Diphosphonates)

BITE FORCE
Bite forces with mandibular implant-retained overdentures. Fontijn-Tekamp, F.A., *et al.*, 1832
Food-holding and -biting behavior in human subjects lacking periodontal receptors. Trulsson, M. and Gunne, H.S.J., 574
Force vectors of single motor units in a multipennate muscle. Turkawski, S.J.J., *et al.*, 1823
Loading of a unilateral temporomandibular joint prosthesis: a three-dimensional mathematical study. van Loon, J.-P., *et*

al., 1939
Proteoglycan expression in the rat temporomandibular joint in response to unilateral bite raise. Mao, J.J., *et al.*, 1520
Riddle of the large loss in bite force after fast jaw-closing movements, The. Slager, G.E.C., *et al.*, 1684

BLOOD
Mercury concentrations in urine and whole blood associated with amalgam exposure in a US military population. Kingman, A., *et al.*, 461
Mercury in biological fluids after amalgam removal. Sandborgh-Englund, G., *et al.*, 615

BONDING (see Dental Bonding; Dentin-Bonding Agents)

BONE AND BONES
Process of physical weakening and dissolution of the HA-coated implant in bone and soft tissue, The. Ogiso, M., *et al.*, 1426

BONE DENSITY
Association between water-borne fluoride and bone mineral density in older adults. Phipps, K.R., *et al.*, 1739

BONE LOSS, PERIODONTAL (see Alveolar Bone Loss)

BONE MATRIX
In situ phosphorylation of bone and dentin proteins by the casein kinase II-like enzyme. Suzuki, Y., *et al.*, 1799

BONE MINERALIZATION (see Calcification, Physiologic)

BONE MORPHOGENETIC PROTEINS
Bone morphogenetic protein-7 (osteogenic protein-1, OP-1) and tooth development. Helder, M.N., *et al.*, 545

BONE REGENERATION
Continuous administration of basic fibroblast growth factor (FGF-2) accelerates bone induction on rat calvaria—an application of a new drug delivery system. Kimoto, T., *et al.*, 1965

BONE RESORPTION
Inhibition of tooth eruption in the rat by a bisphosphonate. Grier, R.L. and Wise, G.E., 8
Threshold for bone resorption induced by continuous and intermittent pressure in the rat hard palate. Sato, T., *et al.*, 387

BONE SUBSTITUTES
"In vitro" dissolution of coral in peritoneal or fibroblast cell cultures. Fricain, J.-Ch., *et al.*, 406

BRIDGE, RESIN-BONDED (see Denture, Partial, Fixed, Resin-Bonded)

BRUXISM
Effects of dopaminergic drugs, occlusal disharmonies, and chronic stress on non-functional masticatory activity in the rat, assessed by incisal attrition. Gómez, F.M., *et al.*, 1454
Sleep bruxism is a disorder related to periodic arousals during sleep. Macaluso, G.M., *et al.*, 565
Wear of human enamel: a quantitative *in vitro* assessment. Kaidonis, J.A., *et al.*, 1983

BUFFERS
Quantitative analysis of amelogenin solubility. Tan, J., *et al.*, 1388

CAFFEINE
Cyclic ADP-ribose induces Ca^{2+} release from caffeine-insensitive Ca^{2+} pools in canine salivary gland cells. Yamaki, H., *et al.*, 1807

CALCIFICATION, PHYSIOLOGIC
In situ phosphorylation of bone and dentin proteins by the casein kinase II-like enzyme. Suzuki, Y., *et al.*, 1799

CALCIUM
Carbachol-induced oxygen consumption in slices from developing rat submandibular and parotid glands. Stojić, D., 1647
Cyclic ADP-ribose induces Ca^{2+} release from caffeine-insensitive Ca^{2+} pools in canine salivary gland cells. Yamaki, H., *et al.*, 1807
Enamelysin (matrix metalloproteinase-20): localization in the developing tooth and effects of pH and calcium on amelogenin hydrolysis. Fukae, M., *et al.*, 1580
Reactivity of fluoride-containing calcium aluminosilicate glasses used in dental glass-ionomer cements. De Maeyer, E.A.P., *et al.*, 2005

CALCIUM-BINDING PROTEINS
cDNA cloning of S100 calcium-binding proteins from bovine periodontal ligament and their expression in oral tissues. Duarte, W.R., *et al.*, 1694

CALCIUM PHOSPHATES
Composition of plaque and saliva following a sucrose challenge and use of an α-tricalcium-phosphate-containing chewing gum. Vogel, G.L., *et al.*, 518, 1575 *(erratum)*

CALMODULIN
Cyclic ADP-ribose induces Ca^{2+} release from caffeine-insensitive Ca^{2+} pools in canine salivary gland cells. Yamaki, H., *et al.*, 1807

CARBACHOL
Carbachol-induced oxygen consumption in slices from developing rat submandibular and parotid glands. Stojić, D., 1647

CARBOHYDRATES
Gingival inflammation induced by food and short-chain carboxylic acids. Kashket, S., *et al.*, 412
Oral streptococci...products of their environment. Burne, R.A., 445

CARBONATES
Mechanical properties of hydroxyapatite and OH-carbonated hydroxyapatite single crystals. Teraoka, K., *et al.*, 1560

CARBOXYLIC ACIDS
Gingival inflammation induced by food and short-chain carboxylic acids. Kashket, S., *et al.*, 412

CARIOGENIC AGENTS
Longitudinal analysis of the association of human salivary antimicrobial agents with caries increment and cariogenic micro-organisms: a two-year cohort study. Kirstilä, V., *et al.*, 73

CARIOSTATIC AGENTS
Composition of plaque and saliva following a sucrose challenge and use of an α-tricalcium-phosphate-containing chewing gum. Vogel, G.L., *et al.*, 518, 1575 *(erratum)*
Effects of aged fluoride-containing restorative materials on recurrent root caries. Hsu, C.-Y.S., *et al.*, 418
Halcyon days of clinical field studies of dental caries prevention, 1960–1980, The. Horowitz, H.S., 1380

CARTILAGE
Proteoglycan expression in the rat temporomandibular joint in response to unilateral bite raise. Mao, J.J., *et al.*, 1520

CASEINS
In situ phosphorylation of bone and dentin proteins by the casein kinase II-like enzyme. Suzuki, Y., *et al.*, 1799

CATS
Swallowing-related perihypoglossal neurons projecting to hypoglossal motoneurons in the cat. Ono, T., *et al.*, 351

CATTLE
cDNA cloning of S100 calcium-binding proteins from bovine periodontal ligament and their expression in oral tissues. Duarte, W.R., *et al.*, 1694

CD4-POSITIVE T-LYMPHOCYTES
Cytokine profiles of cells extracted from humans with periodontal disease.

Gemmell, E. and Seymour, G.J., 16

CD8-POSITIVE T-LYMPHOCYTES
Cytokine profiles of cells extracted from humans with periodontal disease. Gemmell, E. and Seymour, G.J., 16

cDNA (see DNA, Complementary)

CELL ADHESION
RGD peptides regulate the specific adhesion scheme of osteoblasts to hydroxyapatite but not to titanium. Okamoto, K., *et al.*, 481
Synthetic integrin-binding peptides promote adhesion and proliferation of human periodontal ligament cells *in vitro*. Grzesik, W.J., *et al.*, 1606

CELL CULTURE
"In vitro" dissolution of coral in peritoneal or fibroblast cell cultures. Fricain, J.-Ch., *et al.*, 406

CELL TRANSFORMATION, NEOPLASTIC
Changes in the expression of extracellular matrix (ECM) and matrix metalloproteinases (MMP) of proliferating rat parotid acinar cells. Broverman, R.L., *et al.*, 1504

CELLS, CULTURED
Attachment formation following replantation of cultured cells into periodontal defects—a study in minipigs. Lang, H., *et al.*, 393
Novel organ culture method to study the function of human odontoblasts *in vitro*: gelatinase expression by odontoblasts is differentially regulated by TGF-β1. Tjäderhane, L., *et al.*, 1486

CEMENTOBLASTS
Expression of transforming growth factor-beta 1 (TGF-β1) in the developing periodontium of rats. Gao, J., *et al.*, 1708

CENTRAL NERVOUS SYSTEM STIMULANTS
Salivary secretions: narcolepsy and central nervous system stimulants. Nordgarden, H., *et al.*, 1817

CERAMICS
Chemical durability of Dicor and fluorocanasite-based glass-ceramics. Anusavice, K.J. and Zhang, N.-Z., 1553
Effect of ion exchange on the microstructure, strength, and thermal expansion behavior of a leucite-reinforced porcelain. Denry, I.L., *et al.*, 583
Mechanical characterization of dental ceramics by Hertzian contacts. Peterson, I.M., *et al.*, 589

CESIUM
Effect of ion exchange on the microstructure, strength, and thermal expansion behavior of a leucite-reinforced porcelain. Denry, I.L., *et al.*, 583

CHEMOTAXIS, LEUKOCYTE
HLA-DR alleles are associated with IDDM, but not with impaired neutrophil chemotaxis in IDDM. Gustke, C.J., *et al.*, 1497

CHEWING GUM
Composition of plaque and saliva following a sucrose challenge and use of an α-tricalcium-phosphate-containing chewing gum. Vogel, G.L., *et al.*, 518, 1575 (erratum)
Effect of three months' frequent use of sugar-free chewing gum with and without urea on calculus formation. Fure, *et al.*, 1630
Effects of xylitol-containing chewing gums on dental plaque and acidogenic potential, The. Scheie, A.Aa., *et al.*, 1547

CHEWING (see Mastication)

CHILDREN
Colonization with mutans streptococci and lactobacilli and the caries experience of children after the age of five. Straetemans, M.M.E., *et al.*, 1851

CHLORIDE CHANNELS
Potassium and chloride channels in freshly isolated rat odontoblasts. Guo, L. and Davidson, R.M., 341

CHLOROQUINE
"In vitro" dissolution of coral in peritoneal or fibroblast cell cultures. Fricain, J.-Ch., *et al.*, 406

CHONDROITIN SULFATES
Proteoglycan expression in the rat temporomandibular joint in response to unilateral bite raise. Mao, J.J., *et al.*, 1520

CHROMATOGRAPHY, GAS
Residual monomer/additive release and variability in cytotoxicity of light-curing glass-ionomer cements and compomers. Geurtsen, W., *et al.*, 2012

CHROMATOGRAPHY, HIGH-PRESSURE LIQUID
Modification of amino acid residues in carious dentin matrix. Kleter, G.A., *et al.*, 488

CIRCADIAN RHYTHM
Circadian rhythms in the incorporation and secretion of ^{3}H-proline by odontoblasts in relation to incremental lines in rat dentin. Ohtsuka, M., *et al.*, 1889

CLEFT PALATE
Diphenylhydantoin affects glycosaminoglycans and collagen production by human fibroblasts from cleft palate patients. Bosi, G., *et al.*, 1613

CLINICAL TRIALS
Halcyon days of clinical field studies of dental caries prevention, 1960–1980, The. Horowitz, H.S., 1380

CLONING, MOLECULAR
cDNA cloning of S100 calcium-binding proteins from bovine periodontal ligament and their expression in oral tissues. Duarte, W.R., *et al.*, 1694
Cloning, characterization, and tissue expression pattern of mouse tuftelin cDNA. MacDougall, M., *et al.*, 1970

CLOT RETRACTION
Morphometric studies of collagen and fibrin lattices contracted by human gingival fibroblasts; comparison with dermal fibroblasts. Lorimier, S., *et al.*, 1717

CNIDARIA
"In vitro" dissolution of coral in peritoneal or fibroblast cell cultures. Fricain, J.-Ch., *et al.*, 406

COCAINE
Carl Koller: mankind's greatest benefactor? the story of local anesthesia. Leonard, M., 535

COLLAGEN
Changes in the expression of extracellular matrix (ECM) and matrix metalloproteinases (MMP) of proliferating rat parotid acinar cells. Broverman, R.L., *et al.*, 1504
Circadian rhythms in the incorporation and secretion of ^{3}H-proline by odontoblasts in relation to incremental lines in rat dentin. Ohtsuka, M., *et al.*, 1889
Continuous administration of basic fibroblast growth factor (FGF-2) accelerates bone induction on rat calvaria—an application of a new drug delivery system. Kimoto, T., *et al.*, 1965
Diphenylhydantoin affects glycosaminoglycans and collagen production by human fibroblasts from cleft palate patients. Bosi, G., *et al.*, 1613
Flow cytometry analysis of gingival and periodontal ligament cells. Kuru, L., *et al.*, 555
Morphometric studies of collagen and fibrin lattices contracted by human gingival fibroblasts; comparison with dermal fibroblasts. Lorimier, S., *et al.*, 1717
TEM study of two water-based adhesive systems bonded to dry and wet dentin, A. Van Meerbeek, B., *et al.*, 50

COLLAGENASES
Activation and function of host matrix metalloproteinases in dentin matrix breakdown in caries lesions, The. Tjäderhane, L., *et al.*, 1622

COLONIZATION (see Bacterial Adhesion)

COMPOSITES
Crack propagation directions in unfilled resins. Baran, G., *et al.*, 1864
Do dental composites always shrink toward the light? Versluis, A., *et al.*, 1435
Effect of heating delay on conversion and strength of a post-cured resin composite. Loza-Herrero, M.A., *et al.*, 426
Effects of N-methacryloyl amino acid applications on hybrid layer formation at the interface of intertubular dentin. Suzuki, K., *et al.*, 1881
Effects of various resin composite (co)monomers and extracts on two caries-associated micro-organisms *in vitro*. Hansel, C., *et al.*, 60
Elements of light-cured epoxy-based dental polymer systems. Millich, F., *et al.*, 603
Interfacial characteristics of resin-modified glass-ionomer materials: a study on fluid permeability using confocal fluorescence microscopy. Sidhu, S.K. and Watson, T.F., 1749

CONDYLE (see Mandibular Condyle)

CONGENITAL DEFECTS (see Abnormalities; Tooth Abnormalities)

CONTRACTION
Distortion behavior of heat-activated acrylic denture-base resin in conventional and long, low-temperature processing methods. Kawara, M., *et al.*, 1446
Do dental composites always shrink toward the light? Versluis, A., *et al.*, 1435

CONTROLLED-RELEASE PREPARATIONS (see Delayed-Action Preparations)

COPPER
Cytotoxicity of dental alloy extracts and corresponding metal salt solutions. Schmalz, G., *et al.*, 1772
Surface chemistry of a high-copper dental amalgam. McDermott, A.J., *et al.*, 1999

CORALS (see Cnidaria)

CRACKS (see Fractures; Tooth Fractures)

CRANIOFACIAL ABNORMALITIES
Morphometric analysis of the primary and permanent dentitions in hemifacial microsomia: a controlled study. Kim Seow, W., *et al.*, 27

CRANIOFACIAL BONES (see Facial Bones)

CREVICULAR FLUID (see Gingival Crevicular Fluid)

CRYSTALLIZATION
Mechanical properties of hydroxyapatite and OH-carbonated hydroxyapatite single crystals. Teraoka, K., *et al.*, 1560
Process of physical weakening and dissolution of the HA-coated implant in bone and soft tissue, The. Ogiso, M., *et al.*, 1426

CULTURE MEDIA
Novel organ culture method to study the function of human odontoblasts *in vitro*: gelatinase expression by odontoblasts is differentially regulated by TGF-β1. Tjäderhane, L., *et al.*, 1486
Toxicity of formaldehyde to human oral fibroblasts and epithelial cells: influences of culture conditions and role of thiol status. Nilsson, J.A., *et al.*, 1896

CULTURED CELLS (see Cells, Cultured)

CURING (see Light Curing)

CYCLIC AMP
Cyclic ADP-ribose induces Ca^{2+} release from caffeine-insensitive Ca^{2+} pools in canine salivary gland cells. Yamaki, H., *et al.*, 1807

CYSTATINS
Abnormally high levels of cystatin S in submandibular glands, saliva, and gingiva of plaque-resistant rats. Abe, K., *et al.*, 1913

CYTOCHALASIN B
"In vitro" dissolution of coral in peritoneal or fibroblast cell cultures. Fricain, J.-Ch., *et al.*, 406

CYTOKINES
Commensal communism and the oral cavity. Henderson, B. and Wilson, M., 1674
Continuous administration of basic fibroblast growth factor (FGF-2) accelerates bone induction on rat calvaria—an application of a new drug delivery system. Kimoto, T., *et al.*, 1965
Cytokine profiles of cells extracted from humans with periodontal disease. Gemmell, E. and Seymour, G.J., 16

CYTOTOXICITY
Cytotoxicity of dental alloy extracts and corresponding metal salt solutions. Schmalz, G., *et al.*, 1772
Residual monomer/additive release and variability in cytotoxicity of light-curing glass-ionomer cements and compomers. Geurtsen, W., *et al.*, 2012

DEGLUTITION
Swallowing-related perihypoglossal neurons projecting to hypoglossal motoneurons in the cat. Ono, T., *et al.*, 351

DELAYED-ACTION PREPARATIONS
Distribution of fluoride in the oral cavity after application of a bioadhesive fluoride-releasing tablet. Bottenberg, P., *et al.*, 68

DENTAL ALLOYS
Cytotoxicity of dental alloy extracts and corresponding metal salt solutions. Schmalz, G., *et al.*, 1772
Indentation creep behavior of a direct-filling silver alternative to amalgam. Xu, H.H.K., *et al.*, 1991

DENTAL AMALGAM
Activation of the immune system and systemic immune-complex deposits in Brown Norway rats with dental amalgam restorations. Hultman, P., *et al.*, 1415
Effects of aged fluoride-containing restorative materials on recurrent root caries. Hsu, C.-Y.S., *et al.*, 418
Indentation creep behavior of a direct-filling silver alternative to amalgam. Xu, H.H.K., *et al.*, 1991
Long-term survival of extensive amalgam restorations. Plasmans, P.J.J.M., *et al.*, 453
Mercury concentrations in urine and whole blood associated with amalgam exposure in a US military population. Kingman, A., *et al.*, 461
Mercury in biological fluids after amalgam removal. Sandborgh-Englund, G., *et al.*, 615
Surface chemistry of a high-copper dental amalgam. McDermott, A.J., *et al.*, 1999

DENTAL ANXIETY
Emotional responses evoked by dental odors: an evaluation from autonomic parameters. Robin, O., *et al.*, 1638

DENTAL BONDING
Effects of N-methacryloyl amino acid applications on hybrid layer formation at the interface of intertubular dentin. Suzuki, K., *et al.*, 1881
Five-year multi-practice clinical study on posterior resin-bonded bridges, A. De Kanter, R.J.A.M., *et al.*, 609
Interfacial characteristics of resin-modified glass-ionomer materials: a study on fluid permeability using confocal fluorescence microscopy. Sidhu, S.K. and Watson, T.F., 1749
TEM study of two water-based adhesive systems bonded to dry and wet dentin, A. Van Meerbeek, B., *et al.*, 50

DENTAL CALCULUS
Effect of three months' frequent use of sugar-free chewing gum with and without urea on calculus formation. Fure, *et al.*, 1630

DENTAL CARIES
Activation and function of host matrix metalloproteinases in dentin matrix breakdown in caries lesions, The. Tjäderhane, L., *et al.*, 1622
Agglutinin and acidic proline-rich protein receptor patterns may modulate bacterial adherence and colonization on tooth surfaces. Carlén, A., *et al.*, 81
CO_2 laser inhibition of artificial caries-like lesion progression in dental enamel. Featherstone, J.D.B., *et al.*, 1397
Colonization with mutans streptococci and lactobacilli and the caries experience of children after the age of five. Straetemans, M.M.E., *et al.*, 1851
Comparison between Er:YAG laser and conventional technique for root caries treatment *in vitro*. Aoki, A., *et al.*, 1404
Effects of aged fluoride-containing restorative materials on recurrent root caries. Hsu, C.-Y.S., *et al.*, 418
Effects of various resin composite (co)monomers and extracts on two caries-associated micro-organisms *in vitro*. Hansel, C., *et al.*, 60
Halcyon days of clinical field studies of dental caries prevention, 1960–1980, The. Horowitz, H.S., 1380
Longitudinal analysis of the association of human salivary antimicrobial agents with caries increment and cariogenic micro-organisms: a two-year cohort study. Kirstilä, V., *et al.*, 73
Modification of amino acid residues in carious dentin matrix. Kleter, G.A., *et al.*, 488
Oral streptococci...products of their environment. Burne, R.A., 445

DENTAL CAVITY PREPARATION
Comparison between Er:YAG laser and conventional technique for root caries treatment *in vitro*. Aoki, A., *et al.*, 1404

DENTAL CEMENTUM
Attachment formation following replantation of cultured cells into periodontal defects—a study in minipigs. Lang, H., *et al.*, 393
Expression of transforming growth factor-beta 1 (TGF-β1) in the developing periodontium of rats. Gao, J., *et al.*, 1708

DENTAL ENAMEL
Adenomatous polyposis coli protein is expressed in alternate stages of the ameloblast life cycle. Wang, M., *et al.*, 1979
Cloning, characterization, and tissue expression pattern of mouse tuftelin cDNA. MacDougall, M., *et al.*, 1970
CO_2 laser inhibition of artificial caries-like lesion progression in dental enamel. Featherstone, J.D.B., *et al.*, 1397
Enamelysin (matrix metalloproteinase-20): localization in the developing tooth and effects of pH and calcium on amelogenin hydrolysis. Fukae, M., *et al.*, 1580
Indentation damage and mechanical properties of human enamel and dentin. Xu, H.H.K., *et al.*, 472
Laminin γ2 expression is developmentally regulated during murine tooth morphogenesis and is intense in ameloblasts. Sahlberg, C., *et al.*, 1589
Purification, characterization, and cloning of enamel matrix serine proteinase 1. Simmer, J.P., *et al.*, 377
Quantitative analysis of amelogenin solubility. Tan, J., *et al.*, 1388
Wear of human enamel: a quantitative *in vitro* assessment. Kaidonis, J.A., *et al.*, 1983

DENTAL ENAMEL HYPOPLASIA
Laminin γ2 expression is developmentally regulated during murine tooth morphogenesis and is intense in ameloblasts. Sahlberg, C., *et al.*, 1589

DENTAL ENAMEL PROTEINS
Protein-to-protein interactions: criteria defining the assembly of the enamel organ matrix. Paine, M.L., *et al.*, 496

DENTAL HEALTH SURVEYS
Perceptions of the natural dentition in the context of multiple variables. Gift, H.C., *et al.*, 1529

DENTAL IMPLANTATION, ENDOSSEOUS
Bite forces with mandibular implant-retained overdentures. Fontijn-Tekamp, F.A., *et al.*, 1832
Food-holding and -biting behavior in human subjects lacking periodontal receptors. Trulsson, M. and Gunne, H.S.J., 574
Mechanical properties of hydroxyapatite and OH-carbonated hydroxyapatite single crystals. Teraoka, K., *et al.*, 1560
Process of physical weakening and dissolution of the HA-coated implant in bone and soft tissue, The. Ogiso, M., *et al.*, 1426
RGD peptides regulate the specific adhesion scheme of osteoblasts to hydroxyapatite but not to titanium. Okamoto, K., *et al.*, 481

DENTAL IMPRESSION MATERIALS
Rheological properties of elastomeric impression materials before and during setting. McCabe, J.F. and Arikawa, H., 1874

DENTAL MATERIALS
Effects of aged fluoride-containing restorative materials on recurrent root caries. Hsu, C.-Y.S., *et al.*, 418

DENTAL OCCLUSION
Anthropology, tooth wear, and occlusion *ab origine*. Young, W.G., 1860
Effects of dopaminergic drugs, occlusal disharmonies, and chronic stress on non-functional masticatory activity in the rat, assessed by incisal attrition. Gómez, F.M., *et al.*, 1454
Proteoglycan expression in the rat temporomandibular joint in response to unilateral bite raise. Mao, J.J., *et al.*, 1520

DENTAL PLAQUE
Abnormally high levels of cystatin S in submandibular glands, saliva, and gingiva of plaque-resistant rats. Abe, K., *et al.*, 1913
Agglutinin and acidic proline-rich protein receptor patterns may modulate bacterial adherence and colonization on tooth surfaces. Carlén, A., *et al.*, 81
Composition of plaque and saliva following a sucrose challenge and use of an α-tricalcium-phosphate-containing chewing gum. Vogel, G.L., *et al.*, 518, 1575 *(erratum)*
Effect of three months' frequent use of sugar-free chewing gum with and without urea on calculus formation. Fure, *et al.*, 1630
Effects of xylitol-containing chewing gums on dental plaque and acidogenic potential, The. Scheie, A.Aa., *et al.*, 1547
Oral streptococci...products of their environment. Burne, R.A., 445

DENTAL PORCELAIN
Chemical durability of Dicor and fluorocanasite-based glass-ceramics. Anusavice, K.J. and Zhang, N.-Z., 1553
Effect of ion exchange on the microstructure, strength, and thermal expansion behavior of a leucite-reinforced porcelain. Denry, I.L., *et al.*, 583
Mechanical characterization of dental ceramics by Hertzian contacts. Peterson, I.M., *et al.*, 589

DENTAL PULP
Localization of estrogen-receptor-related antigen in human odontoblasts. Hietala, E.-L., *et al.*, 1384
Road to pulp biology research: a personal odyssey, The. Stanley, H.R., 1670

DENTAL PULP CAVITY
Novel organ culture method to study the function of human odontoblasts *in vitro*: gelatinase expression by odontoblasts is differentially regulated by TGF-β1. Tjäderhane, L., *et al.*, 1486

DENTAL RESEARCH (see Research)

DENTAL RESTORATION WEAR
Crack propagation directions in unfilled resins. Baran, G., *et al.*, 1864

DENTAL STRESS ANALYSIS
Crack propagation directions in unfilled resins. Baran, G., *et al.*, 1864

DENTIN
Activation and function of host matrix metalloproteinases in dentin matrix breakdown in caries lesions, The. Tjäderhane, L., *et al.*, 1622
Circadian rhythms in the incorporation and secretion of ^{3}H-proline by odontoblasts in relation to incremental lines in rat dentin. Ohtsuka, M., *et al.*, 1889
Effects of N-methacryloyl amino acid applications on hybrid layer formation at the interface of intertubular dentin. Suzuki, K., *et al.*, 1881
Indentation damage and mechanical properties of human enamel and dentin. Xu, H.H.K., *et al.*, 472
In situ phosphorylation of bone and dentin proteins by the casein kinase II-like enzyme. Suzuki, Y., *et al.*, 1799
Modification of amino acid residues in carious dentin matrix. Kleter, G.A., *et al.*, 488
Potassium is involved in apatite biomineralization. Wiesmann, H.-P., *et al.*, 1654
TEM study of two water-based adhesive systems bonded to dry and wet dentin, A. Van Meerbeek, B., *et al.*, 50

DENTIN-BONDING AGENTS
Effects of N-methacryloyl amino acid applications on hybrid layer formation at the interface of intertubular dentin. Suzuki, K., *et al.*, 1881
Interfacial characteristics of resin-modified glass-ionomer materials: a study on fluid permeability using confocal fluorescence microscopy. Sidhu, S.K. and Watson, T.F., 1749
TEM study of two water-based adhesive systems bonded to dry and wet dentin, A. Van Meerbeek, B., *et al.*, 50

DENTITION
Forty-five-year tooth survival probabilities among men in Oslo, Norway. Hujoel, P.P., *et al.*, 2020
Morphometric analysis of the primary and permanent dentitions in hemifacial microsomia: a controlled study. Kim Seow, W., *et al.*, 27
Perceptions of the natural dentition in the context of multiple variables. Gift, H.C., *et al.*, 1529

DENTURE, OVERLAY
Bite forces with mandibular implant-retained overdentures. Fontijn-Tekamp, F.A., *et al.*, 1832

DENTURE, PARTIAL, FIXED, RESIN-BONDED
Five-year multi-practice clinical study on posterior resin-bonded bridges, A. De Kanter, R.J.A.M., *et al.*, 609

DENTURE BASES
Distortion behavior of heat-activated acrylic denture-base resin in conventional and long, low-temperature processing methods. Kawara, M., *et al.*, 1446

DENTURES
Food-holding and -biting behavior in human subjects lacking periodontal receptors. Trulsson, M. and Gunne, H.S.J., 574
Threshold for bone resorption induced by continuous and intermittent pressure in the rat hard palate. Sato, T., *et al.*, 387

DIABETES MELLITUS, INSULIN-DEPENDENT
HLA-DR alleles are associated with IDDM, but not with impaired neutrophil chemotaxis in IDDM. Gustke, C.J., *et al.*, 1497

DIAGNOSIS, ORAL
Guest editorial: probing the depths: the promise and pitfalls of periodontal diagnostics. Barnett, M.L., 436

DIET
Anthropology, tooth wear, and occlusion *ab origine*. Young, W.G., 1860
Food properties that influence neuromuscular activity during human mastication. Agrawal, K.R., *et al.*, 1931
Functional properties of jaw and tongue muscles in rats fed a liquid diet after being weaned. Liu, Z.J., *et al.*, 366
Gingival inflammation induced by food and short-chain carboxylic acids. Kashket, S., *et al.*, 412

DIPHENYLHYDANTOIN
Diphenylhydantoin affects glycosaminoglycans and collagen production by human fibroblasts from cleft palate patients. Bosi, G., *et al.*, 1613

DIPHENYLIODONIUMCHLORIDE
Residual monomer/additive release and variability in cytotoxicity of light-curing glass-ionomer cements and compomers. Geurtsen, W., *et al.*, 2012

DIPHOSPHONATES
Inhibition of tooth eruption in the rat by a bisphosphonate. Grier, R.L. and Wise, G.E., 8

DISSOLUTION (see Solubility)

DNA, COMPLEMENTARY
cDNA cloning of S100 calcium-binding proteins from bovine periodontal ligament and their expression in oral tissues. Duarte, W.R., *et al.*, 1694
Cloning, characterization, and tissue expression pattern of mouse tuftelin cDNA. MacDougall, M., *et al.*, 1970
Purification, characterization, and cloning of enamel matrix serine proteinase 1. Simmer, J.P., *et al.*, 377

DNA SEQUENCE (see Base Sequence)

DNA SEQUENCING (see Sequence Analysis, DNA)

DOGS
Cyclic ADP-ribose induces Ca^{2+} release from caffeine-insensitive Ca^{2+} pools in canine salivary gland cells. Yamaki, H., *et al.*, 1807
Process of physical weakening and dissolution of the HA-coated implant in bone and soft tissue, The. Ogiso, M., *et al.*, 1426

DOPAMINE AGENTS
Effects of dopaminergic drugs, occlusal disharmonies, and chronic stress on non-functional masticatory activity in the rat, assessed by incisal attrition. Gómez, F.M., *et al.*, 1454

DRUG DELIVERY SYSTEMS
Continuous administration of basic fibroblast growth factor (FGF-2) accelerates bone induction on rat calvaria—an application of a new drug delivery system. Kimoto, T., *et al.*, 1965
Distribution of fluoride in the oral cavity after application of a bioadhesive fluoride-releasing tablet. Bottenberg, P., *et al.*, 68

EDUCATION, DENTAL
Dr. Robert S. Harris: nutritionist, oral science researcher, and visionary MIT educator. Navia, J.M., 438
Israel Kleinberg: oral biology north and south. Golub, L.M. and Kaufman, H.W., 1956

EGDMA (see Ethylene Glycol Dimethacrylate)

ELASTOMERS (see Rubber)

ELDERLY (see Aged)

ELECTRIC STIMULATION
Heteronymous H-reflex in temporal muscle motor units. Macaluso, G.M., *et al.*, 1960

ELECTROMYOGRAPHY
Automatic on-line one-channel recognition of masseter activity. Gallo, L.M., *et al.*, 1539

Food properties that influence neuromuscular activity during human mastication. Agrawal, K.R., *et al.*, 1931
Functional properties of jaw and tongue muscles in rats fed a liquid diet after being weaned. Liu, Z.J., *et al.*, 366
Heteronymous H-reflex in temporal muscle motor units. Macaluso, G.M., *et al.*, 1960

EMBRYO DEVELOPMENT
(see Fetal Development)

EMOTIONS
Emotional responses evoked by dental odors: an evaluation from autonomic parameters. Robin, O., *et al.*, 1638

ENAMEL ORGAN
Adenomatous polyposis coli protein is expressed in alternate stages of the ameloblast life cycle. Wang, M., *et al.*, 1979
Protein-to-protein interactions: criteria defining the assembly of the enamel organ matrix. Paine, M.L., *et al.*, 496
Purification, characterization, and cloning of enamel matrix serine proteinase 1. Simmer, J.P., *et al.*, 377

ENAMEL (see Dental Enamel)

ENAMELYSIN (see Metalloproteinases)

EPITHELIAL ATTACHMENT
Attachment formation following replantation of cultured cells into periodontal defects—a study in minipigs. Lang, H., *et al.*, 393

EPITHELIAL CELLS
Toxicity of formaldehyde to human oral fibroblasts and epithelial cells: influences of culture conditions and role of thiol status. Nilsson, J.A., *et al.*, 1896

EPITHELIUM
Epithelium-tooth interface—a basal lamina rich in laminin-5 and lacking other known laminin isoforms, The. Hormia, M., *et al.*, 1479

EPOXY RESINS
Elements of light-cured epoxy-based dental polymer systems. Millich, F., *et al.*, 603

ESTROGENS
Localization of estrogen-receptor-related antigen in human odontoblasts. Hietala, E.-L., *et al.*, 1384

ETHYLENE GLYCOL DIMETHACRYLATE
Effects of various resin composite (co)monomers and extracts on two caries-associated micro-organisms *in vitro*. Hansel, C., *et al.*, 60

EUGENOL
Emotional responses evoked by dental odors: an evaluation from autonomic parameters. Robin, O., *et al.*, 1638

EXTRACELLULAR MATRIX
Activation and function of host matrix metalloproteinases in dentin matrix breakdown in caries lesions, The. Tjäderhane, L., *et al.*, 1622
Changes in the expression of extracellular matrix (ECM) and matrix metalloproteinases (MMP) of proliferating rat parotid acinar cells. Broverman, R.L., *et al.*, 1504
Diphenylhydantoin affects glycosaminoglycans and collagen production by human fibroblasts from cleft palate patients. Bosi, G., *et al.*, 1613
Epithelium-tooth interface—a basal lamina rich in laminin-5 and lacking other known laminin isoforms, The. Hormia, M., *et al.*, 1479
In situ phosphorylation of bone and dentin proteins by the casein kinase II-like enzyme. Suzuki, Y., *et al.*, 1799
Laminin γ2 expression is developmentally regulated during murine tooth morphogenesis and is intense in ameloblasts. Sahlberg, C., *et al.*, 1589
Potassium is involved in apatite biomineralization. Wiesmann, H.-P., *et al.*, 1654

EXTRACELLULAR MATRIX PROTEINS
Flow cytometry analysis of gingival and periodontal ligament cells. Kuru, L., *et al.*, 555
Protein-to-protein interactions: criteria defining the assembly of the enamel organ matrix. Paine, M.L., *et al.*, 496
Quantitative analysis of amelogenin solubility. Tan, J., *et al.*, 1388

FACIAL ASYMMETRY
Morphometric analysis of the primary and permanent dentitions in hemifacial microsomia: a controlled study. Kim Seow, W., *et al.*, 27

FACIAL BONES
Functional properties of jaw and tongue muscles in rats fed a liquid diet after being weaned. Liu, Z.J., *et al.*, 366

FACIAL PAIN
Pain maps from facial pain patients indicate a broad pain geography. Türp, J.C., *et al.*, 1465

FERMENTATION
Gingival inflammation induced by food and short-chain carboxylic acids. Kashket, S., *et al.*, 412

FETAL DEVELOPMENT
Relationship between growth and the pattern of tooth initiation in alligator embryos. Osborn, J.W., 1730

FIBRIN
Morphometric studies of collagen and fibrin lattices contracted by human gingival fibroblasts; comparison with dermal fibroblasts. Lorimier, S., *et al.*, 1717

FIBROBLAST GROWTH FACTOR, BASIC
Continuous administration of basic fibroblast growth factor (FGF-2) accelerates bone induction on rat calvaria—an application of a new drug delivery system. Kimoto, T., *et al.*, 1965

FIBROBLASTS
Diphenylhydantoin affects glycosaminoglycans and collagen production by human fibroblasts from cleft palate patients. Bosi, G., *et al.*, 1613
Dual regulatory effects of interferon-α, -β, and γ on interleukin-8 gene expression by human gingival fibroblasts in culture upon stimulation with lipopolysaccharide from *Prevotella intermedia*, interleukin-1α, or tumor necrosis factor-α. Sakuta, T., *et al.*, 1597
Expression of transforming growth factor-beta 1 (TGF-β1) in the developing periodontium of rats. Gao, J., *et al.*, 1708
Flow cytometry analysis of gingival and periodontal ligament cells. Kuru, L., *et al.*, 555
"In vitro" dissolution of coral in peritoneal or fibroblast cell cultures. Fricain, J.-Ch., *et al.*, 406
Morphometric studies of collagen and fibrin lattices contracted by human gingival fibroblasts; comparison with dermal fibroblasts. Lorimier, S., *et al.*, 1717
Proteoglycan expression in the rat temporomandibular joint in response to unilateral bite raise. Mao, J.J., *et al.*, 1520
Serum or growth factor deprivation induces the expression of alkaline phosphatase in human gingival fibroblasts. Abe, T., *et al.*, 1700
Toxicity of formaldehyde to human oral fibroblasts and epithelial cells: influences of culture conditions and role of thiol status. Nilsson, J.A., *et al.*, 1896

FIBRONECTINS
Flow cytometry analysis of gingival and periodontal ligament cells. Kuru, L., *et al.*, 555

FINITE ELEMENT ANALYSIS
Crack propagation directions in unfilled resins. Baran, G., *et al.*, 1864
Finite element study of ultrasonic wave propagation in a tooth phantom, A. Ghorayeb, S.R., *et al.*, 39

FLOW CYTOMETRY
Cytokine profiles of cells extracted from humans with periodontal disease. Gemmell, E. and Seymour, G.J., 16
Flow cytometry analysis of gingival and periodontal ligament cells. Kuru, L., *et al.*, 555

FLUORESCENT DYES
Interfacial characteristics of resin-modified glass-ionomer materials: a study on fluid permeability using confocal fluorescence microscopy. Sidhu, S.K. and Watson, T.F., 1749

FLUORIDATION
Association between water-borne fluoride and bone mineral density in older adults. Phipps, K.R., *et al.*, 1739

FLUORIDES
Distribution of fluoride in the oral cavity after application of a bioadhesive fluoride-releasing tablet. Bottenberg, P., *et al.*, 68
Effects of aged fluoride-containing restorative materials on recurrent root caries. Hsu, C.-Y.S., *et al.*, 418
Halcyon days of clinical field studies of dental caries prevention, 1960–1980, The. Horowitz, H.S., 1380
Reactivity of fluoride-containing calcium aluminosilicate glasses used in dental glass-ionomer cements. De Maeyer, E.A.P., *et al.*, 2005

FLUOROCANASITE
Chemical durability of Dicor and fluorocanasite-based glass-ceramics. Anusavice, K.J. and Zhang, N.-Z., 1553

FOCAL INFECTION, DENTAL
Guest editorial: casual or causal relationship between periodontal infection and non-oral disease? Slots, J., 1764

FOOD (see Diet)

FORMALDEHYDE
Toxicity of formaldehyde to human oral fibroblasts and epithelial cells: influences of culture conditions and role of thiol status. Nilsson, J.A., *et al.*, 1896

FRACTURES
Chemical durability of Dicor and fluorocanasite-based glass-ceramics. Anusavice, K.J. and Zhang, N.-Z., 1553
Crack propagation directions in unfilled resins. Baran, G., *et al.*, 1864
Effect of ion exchange on the microstructure, strength, and thermal expansion behavior of a leucite-reinforced porcelain. Denry, I.L., *et al.*, 583
Indentation creep behavior of a direct-filling silver alternative to amalgam. Xu, H.H.K., *et al.*, 1991
Indentation damage and mechanical properties of human enamel and dentin. Xu, H.H.K., *et al.*, 472
Interfacial characteristics of resin-modified glass-ionomer materials: a study on fluid permeability using confocal fluorescence microscopy. Sidhu, S.K. and Watson, T.F., 1749
Mechanical characterization of dental ceramics by Hertzian contacts. Peterson, I.M., *et al.*, 589
Wear of human enamel: a quantitative *in vitro* assessment. Kaidonis, J.A., *et al.*, 1983

G-PROTEINS
Gustducin and its role in taste. Spielman, A.I., 539

GALARDIN (see Protease Inhibitors)

GAP-43 PROTEIN
Alterations in ultrastructural localization of growth-associated protein-43 (GAP-43) in periodontal Ruffini endings of rat molars during experimental tooth movement. Kobayashi, H., *et al.*, 503

GELATINASES
Novel organ culture method to study the function of human odontoblasts *in vitro*: gelatinase expression by odontoblasts is differentially regulated by TGF-β1. Tjäderhane, L., *et al.*, 1486

GELS
Pharmacokinetic and safety evaluations of ketoprofen gels in subjects with adult periodontitis. Lawrence, H.P., *et al.*, 1904

GENE EXPRESSION
Adenomatous polyposis coli protein is expressed in alternate stages of the ameloblast life cycle. Wang, M., *et al.*, 1979
Bone morphogenetic protein-7 (osteogenic protein-1, OP-1) and tooth development. Helder, M.N., *et al.*, 545
cDNA cloning of S100 calcium-binding proteins from bovine periodontal ligament and their expression in oral tissues. Duarte, W.R., *et al.*, 1694
Changes in the expression of extracellular matrix (ECM) and matrix metalloproteinases (MMP) of proliferating rat parotid acinar cells. Broverman, R.L., *et al.*, 1504
Cloning, characterization, and tissue expression pattern of mouse tuftelin cDNA. MacDougall, M., *et al.*, 1970
Dual regulatory effects of interferon-α, -β, and γ on interleukin-8 gene expression by human gingival fibroblasts in culture upon stimulation with lipopolysaccharide from *Prevotella intermedia*, interleukin-1α, or tumor necrosis factor-α. Sakuta, T., *et al.*, 1597
Expression of transforming growth factor-beta 1 (TGF-β1) in the developing periodontium of rats. Gao, J., *et al.*, 1708
Laminin γ2 expression is developmentally regulated during murine tooth morphogenesis and is intense in ameloblasts. Sahlberg, C., *et al.*, 1589
Serum or growth factor deprivation induces the expression of alkaline phosphatase in human gingival fibroblasts. Abe, T., *et al.*, 1700

GENE LIBRARY
cDNA cloning of S100 calcium-binding proteins from bovine periodontal ligament and their expression in oral tissues. Duarte, W.R., *et al.*, 1694

GENES, APC
Adenomatous polyposis coli protein is expressed in alternate stages of the ameloblast life cycle. Wang, M., *et al.*, 1979

GENES, FOS
Expression of fos in the fat forebrain following experimental tooth movement. Yamashiro, T., *et al.*, 1920

GINGIVA
Abnormally high levels of cystatin S in submandibular glands, saliva, and gingiva of plaque-resistant rats. Abe, K., *et al.*, 1913
Cytokine profiles of cells extracted from humans with periodontal disease. Gemmell, E. and Seymour, G.J., 16
Cytotoxicity of dental alloy extracts and corresponding metal salt solutions. Schmalz, G., *et al.*, 1772
Dual regulatory effects of interferon-α, -β, and γ on interleukin-8 gene expression by human gingival fibroblasts in culture upon stimulation with lipopolysaccharide from *Prevotella intermedia*, interleukin-1α, or tumor necrosis factor-α. Sakuta, T., *et al.*, 1597
Epithelium-tooth interface—a basal lamina rich in laminin-5 and lacking other known laminin isoforms, The. Hormia, M., *et al.*, 1479
Flow cytometry analysis of gingival and periodontal ligament cells. Kuru, L., *et al.*, 555
Gingival inflammation induced by food and short-chain carboxylic acids. Kashket, S., *et al.*, 412
Morphometric studies of collagen and fibrin lattices contracted by human gingival fibroblasts; comparison with dermal fibroblasts. Lorimier, S., *et al.*, 1717
Serum or growth factor deprivation induces the expression of alkaline phosphatase in human gingival fibroblasts. Abe, T., *et al.*, 1700

GINGIVAL CREVICULAR FLUID
Gingival inflammation induced by food and short-chain carboxylic acids. Kashket, S., *et al.*, 412

GLASS
Chemical durability of Dicor and fluorocanasite-based glass-ceramics. Anusavice, K.J. and Zhang, N.-Z., 1553
Reactivity of fluoride-containing calcium aluminosilicate glasses used in dental glass-ionomer cements. De Maeyer, E.A.P., *et al.*, 2005

GLASS-IONOMER CEMENTS
Effects of aged fluoride-containing restorative materials on recurrent root caries. Hsu, C.-Y.S., *et al.*, 418
Interfacial characteristics of resin-modified glass-ionomer materials: a study on fluid permeability using confocal fluorescence microscopy. Sidhu, S.K. and Watson, T.F., 1749
Reactivity of fluoride-containing calcium aluminosilicate glasses used in dental glass-ionomer cements. De Maeyer, E.A.P., *et al.*, 2005
Residual monomer/additive release and variability in cytotoxicity of light-curing glass-ionomer cements and compomers. Geurtsen, W., *et al.*, 2012
Structural integrity of resin-modified glass ionomers as affected by the delay or omission of light activation. de Gee, A.J., *et al.*, 1658

GLYCOSAMINOGLYCANS
Diphenylhydantoin affects glycosaminoglycans and collagen production by human fibroblasts from cleft palate patients. Bosi, G., *et al.*, 1613

GLYCOSYLATION END PRODUCTS, ADVANCED
Modification of amino acid residues in carious dentin matrix. Kleter, G.A., *et al.*, 488

GROWTH AND EMBRYONIC DEVELOPMENT
Relationship between growth and the pattern of tooth initiation in alligator embryos. Osborn, J.W., 1730

GUANOSINE TRIPHOSPHATE
In situ phosphorylation of bone and dentin proteins by the casein kinase II-like enzyme. Suzuki, Y., *et al.*, 1799

GUSTDUCIN
Gustducin and its role in taste. Spielman, A.I., 539

H-REFLEX
Heteronymous H-reflex in temporal muscle motor units. Macaluso, G.M., *et al.*, 1960

HALOPERIDOL
Effects of dopaminergic drugs, occlusal disharmonies, and chronic stress on non-functional masticatory activity in the rat, assessed by incisal attrition. Gómez, F.M., *et al.*, 1454

HAMSTERS
Bone morphogenetic protein-7 (osteogenic protein-1, OP-1) and tooth development. Helder, M.N., *et al.*, 545

HARDNESS
Indentation creep behavior of a direct-filling silver alternative to amalgam. Xu, H.H.K., *et al.*, 1991
Indentation damage and mechanical properties of human enamel and dentin. Xu, H.H.K., *et al.*, 472

HARRIS, ROBERT SAMUEL
Dr. Robert S. Harris: nutritionist, oral science researcher, and visionary MIT educator. Navia, J.M., 438

HEATING
Distortion behavior of heat-activated acrylic denture-base resin in conventional and long, low-temperature processing methods. Kawara, M., *et al.*, 1446
Effect of heating delay on conversion and strength of a post-cured resin composite. Loza-Herrero, M.A., *et al.*, 426

HEMIFACIAL MICROSOMIA
(see Facial Asymmetry)

HISTORY OF DENTISTRY
Biology of tooth eruption, The. Wise, G.E., 1576
Carl Koller: mankind's greatest benefactor? the story of local anesthesia. Leonard, M., 535
Charlotte Schneyer: pioneer in salivary gland research. Hall, H.D., 1476
Dr. Robert S. Harris: nutritionist, oral science researcher, and visionary MIT educator. Navia, J.M., 438
Edgard C. Moreno, PhD: a tribute to his major contributions to oral biology research. Margolis, H.C., 1767
Halcyon days of clinical field studies of dental caries prevention, 1960–1980, The. Horowitz, H.S., 1380
Israel Kleinberg: oral biology north and south. Golub, L.M. and Kaufman, H.W., 1956
Road to pulp biology research: a personal odyssey, The. Stanley, H.R., 1670

HIV INFECTIONS
Submandibular salivary proteases: lack of a role in anti-HIV activity. Kennedy, S., *et al.*, 1515

HLA-DR ANTIGENS
HLA-DR alleles are associated with IDDM, but not with impaired neutrophil chemotaxis in IDDM. Gustke, C.J., *et al.*, 1497

HYBRIDIZATION, IN SITU
(see In Situ Hybridization)

HYDROGEN-ION CONCENTRATION
Activation and function of host matrix metalloproteinases in dentin matrix breakdown in caries lesions, The. Tjäderhane, L., *et al.*, 1622
Effect of three months' frequent use of sugar-free chewing gum with and without urea on calculus formation. Fure, *et al.*, 1630
Enamelysin (matrix metalloproteinase-20): localization in the developing tooth and effects of pH and calcium on amelogenin hydrolysis. Fukae, M., *et al.*, 1580
Oral streptococci...products of their environment. Burne, R.A., 445
Reactivity of fluoride-containing calcium aluminosilicate glasses used in dental glass-ionomer cements. De Maeyer, E.A.P., *et al.*, 2005

HYDROXYAPATITES
Mechanical properties of hydroxyapatite and OH-carbonated hydroxyapatite single crystals. Teraoka, K., *et al.*, 1560
Process of physical weakening and dissolution of the HA-coated implant in bone and soft tissue, The. Ogiso, M., *et al.*, 1426
RGD peptides regulate the specific adhesion scheme of osteoblasts to hydroxyapatite but not to titanium. Okamoto, K., *et al.*, 481

HYPERKINESIS
Psychophysiological assessment of stress in chronic pain: comparisons of stressful stimuli and of response systems. Ohrbach, R., *et al.*, 1840

HYPERPLASIA
Changes in the expression of extracellular matrix (ECM) and matrix matalloproteinases (MMP) of proliferating rat parotid acinar cells. Broverman, R.L., *et al.*, 1504

HYPERTROPHY
Changes in the expression of extracellular matrix (ECM) and matrix matalloproteinases (MMP) of proliferating rat parotid acinar cells. Broverman, R.L., *et al.*, 1504

HYPOGLOSSAL NERVE
Swallowing-related perihypoglossal neurons projecting to hypoglossal motoneurons in the cat. Ono, T., *et al.*, 351

HYPOTHALAMUS
Expression of fos in the fat forebrain following experimental tooth movement. Yamashiro, T., *et al.*, 1920

IADR/AADR
AADR Abstracts, 106
Advancing dental research in the 21st century. Sakuda, M., 1668
Divisional Abstracts, 1101
Errata for abstracts, 1948
High value of AADR membership, The. Robertson, P., 1364
IADR Abstracts, 632

IgA
Longitudinal analysis of the association of human salivary antimicrobial agents with caries increment and cariogenic micro-organisms: a two-year cohort study. Kirstilä, V., *et al.*, 73

IgG
Longitudinal analysis of the association of human salivary antimicrobial agents with caries increment and cariogenic micro-organisms: a two-year cohort study. Kirstilä, V., *et al.*, 73

IMMUNE COMPLEX DISEASES
Activation of the immune system and systemic immune-complex deposits in Brown Norway rats with dental amalgam restorations. Hultman, P., *et al.*, 1415

IMMUNE SYSTEM
Activation of the immune system and systemic immune-complex deposits in Brown Norway rats with dental amalgam restorations. Hultman, P., *et al.*, 1415

IMMUNOGLOBULINS
Longitudinal analysis of the association of human salivary antimicrobial agents with caries increment and cariogenic micro-organisms: a two-year cohort study. Kirstilä, V., *et al.*, 73

IN SITU HYBRIDIZATION
Laminin γ2 expression is developmentally regulated during murine tooth morphogenesis and is intense in ameloblasts. Sahlberg, C., *et al.*, 1589

INDENTATION
Indentation creep behavior of a direct-filling silver alternative to amalgam. Xu, H.H.K., *et al.*, 1991
Indentation damage and mechanical properties of human enamel and dentin. Xu, H.H.K., *et al.*, 472
Mechanical characterization of dental ceramics by Hertzian contacts. Peterson, I.M., *et al.*, 589

INFECTION
Guest editorial: casual or causal relationship between periodontal infection and non-oral disease? Slots, J., 1764

INFLAMMATION
Gingival inflammation induced by food and short-chain carboxylic acids. Kashket, S., *et al.*, 412

INSULIN-LIKE GROWTH FACTORS
Serum or growth factor deprivation induces the expression of alkaline phosphatase in human gingival fibroblasts. Abe, T., *et al.*, 1700

INTEGRINS
Synthetic integrin-binding peptides promote adhesion and proliferation of human periodontal ligament cells *in vitro*. Grzesik, W.J., *et al.*, 1606

INTERFERONS
Cytokine profiles of cells extracted from humans with periodontal disease. Gemmell, E. and Seymour, G.J., 16
Dual regulatory effects of interferon-α, -β, and γ on interleukin-8 gene expression by human gingival fibroblasts in culture upon stimulation with lipopolysaccharide from *Prevotella intermedia*, interleukin-1α, or tumor necrosis factor-α. Sakuta, T., *et al.*, 1597

INTERLEUKINS
Autoregulation of periodontal ligament cell phenotype and functions by transforming growth factor-β1. Brady, T.A., *et al.*, 1779
Cytokine profiles of cells extracted from humans with periodontal disease. Gemmell, E. and Seymour, G.J., 16
Dual regulatory effects of interferon-α, -β, and γ on interleukin-8 gene expression by human gingival fibroblasts in culture upon stimulation with lipopolysaccharide from *Prevotella intermedia*, interleukin-1α, or tumor necrosis factor-α. Sakuta, T., *et al.*, 1597
PDGF-α receptor subunit expression downregulated by IL-1β in human periodontal ligament cells. Oates, T.W., *et al.*, 1791

ION CHANNELS
Potassium and chloride channels in freshly isolated rat odontoblasts. Guo, L. and Davidson, R.M., 341

ION TRANSPORT
Effect of ion exchange on the microstructure, strength, and thermal expansion behavior of a leucite-reinforced porcelain. Denry, I.L., *et al.*, 583

IONS
Quantitative analysis of amelogenin solubility. Tan, J., *et al.*, 1388

ISOPROTERENOL
Changes in the expression of extracellular matrix (ECM) and matrix metalloproteinases (MMP) of proliferating rat parotid acinar cells. Broverman, R.L., *et al.*, 1504

JAW
Functional properties of jaw and tongue muscles in rats fed a liquid diet after being weaned. Liu, Z.J., *et al.*, 366
Riddle of the large loss in bite force after fast jaw-closing movements, The. Slager, G.E.C., *et al.*, 1684

JAW RELATION RECORD
Food-holding and -biting behavior in human subjects lacking periodontal receptors. Trulsson, M. and Gunne, H.S.J., 574

JOURNAL OF DENTAL RESEARCH
Editor's report. Herzberg, M., 4
What's in a name? Spielman, A.I. and Davidson, R., 1572

KETOPROFEN
Pharmacokinetic and safety evaluations of ketoprofen gels in subjects with adult periodontitis. Lawrence, H.P., *et al.*, 1904

KLEINBERG, ISRAEL
Israel Kleinberg: oral biology north and south. Golub, L.M. and Kaufman, H.W., 1956

KOLLER, CARL
Carl Koller: mankind's greatest benefactor? the story of local anesthesia. Leonard, M., 535

LACTOBACILLUS
Colonization with mutans streptococci and lactobacilli and the caries experience of children after the age of five. Straetemans, M.M.E., *et al.*, 1851
Effects of various resin composite (co)monomers and extracts on two caries-associated micro-organisms *in vitro*. Hansel, C., *et al.*, 60
Longitudinal analysis of the association of human salivary antimicrobial agents with caries increment and cariogenic micro-organisms: a two-year cohort study. Kirstilä, V., *et al.*, 73

LACTOFERRIN
Longitudinal analysis of the association of human salivary antimicrobial agents with caries increment and cariogenic micro-organisms: a two-year cohort study. Kirstilä, V., *et al.*, 73

LAMININ
Changes in the expression of extracellular

matrix (ECM) and matrix metalloproteinases (MMP) of proliferating rat parotid acinar cells. Broverman, R.L., *et al.*, 1504
Epithelium-tooth interface—a basal lamina rich in laminin-5 and lacking other known laminin isoforms, The. Hormia, M., *et al.*, 1479
Laminin γ2 expression is developmentally regulated during murine tooth morphogenesis and is intense in ameloblasts. Sahlberg, C., *et al.*, 1589

LARYNGEAL NERVES
Swallowing-related perihypoglossal neurons projecting to hypoglossal motoneurons in the cat. Ono, T., *et al.*, 351

LASERS
CO_2 laser inhibition of artificial caries-like lesion progression in dental enamel. Featherstone, J.D.B., *et al.*, 1397
Comparison between Er:YAG laser and conventional technique for root caries treatment *in vitro*. Aoki, A., *et al.*, 1404

LEUCITE
Effect of ion exchange on the microstructure, strength, and thermal expansion behavior of a leucite-reinforced porcelain. Denry, I.L., *et al.*, 583

LIGHT CURING
Do dental composites always shrink toward the light? Versluis, A., *et al.*, 1435
Effect of heating delay on conversion and strength of a post-cured resin composite. Loza-Herrero, M.A., *et al.*, 426
Elements of light-cured epoxy-based dental polymer systems. Millich, F., *et al.*, 603
Residual monomer/additive release and variability in cytotoxicity of light-curing glass-ionomer cements and compomers. Geurtsen, W., *et al.*, 2012
Structural integrity of resin-modified glass ionomers as affected by the delay or omission of light activation. de Gee, A.J., *et al.*, 1658

LIPOPOLYSACCHARIDES
Dual regulatory effects of interferon-α, -β, and γ on interleukin-8 gene expression by human gingival fibroblasts in culture upon stimulation with lipopolysaccharide from *Prevotella intermedia*, interleukin-1α, or tumor necrosis factor-α. Sakuta, T., *et al.*, 1597

LUBRICATION
Wear of human enamel: a quantitative *in vitro* assessment. Kaidonis, J.A., *et al.*, 1983

LYMPHOCYTES
Cytokine profiles of cells extracted from humans with periodontal disease. Gemmell, E. and Seymour, G.J., 16

LYSOZYME (see Muramidase)

MACROPHAGES
Cytokine profiles of cells extracted from humans with periodontal disease. Gemmell, E. and Seymour, G.J., 16

MAILLARD REACTION
Modification of amino acid residues in carious dentin matrix. Kleter, G.A., *et al.*, 488

MANDIBLE
Bite forces with mandibular implant-retained overdentures. Fontijn-Tekamp, F.A., *et al.*, 1832
Loading of a unilateral temporomandibular joint prosthesis: a three-dimensional mathematical study. van Loon, J.-P., *et al.*, 1939

MANDIBULAR CONDYLE
Proteoglycan expression in the rat temporomandibular joint in response to unilateral bite raise. Mao, J.J., *et al.*, 1520
Reaction strains on the condylar neck during mastication and maximum muscle stimulation in different condylar positions: an experimental study in the miniature pig. Marks, L., *et al.*, 527 *(errata)*, 1412

MARGINAL ADAPTATION (DENTISTRY)
Do dental composites always shrink toward the light? Versluis, A., *et al.*, 1435
Indentation creep behavior of a direct-filling silver alternative to amalgam. Xu, H.H.K., *et al.*, 1991

MASSACHUSETTS INSTITUTE OF TECHNOLOGY
Dr. Robert S. Harris: nutritionist, oral science researcher, and visionary MIT educator. Navia, J.M., 438

MASSETER MUSCLE
Automatic on-line one-channel recognition of masseter activity. Gallo, L.M., *et al.*, 1539
Force vectors of single motor units in a multipennate muscle. Turkawski, S.J.J., *et al.*, 1823
Heteronymous H-reflex in temporal muscle motor units. Macaluso, G.M., *et al.*, 1960
Riddle of the large loss in bite force after fast jaw-closing movements, The. Slager, G.E.C., *et al.*, 1684

MASTICATION
Anthropology, tooth wear, and occlusion *ab origine*. Young, W.G., 1860
Effects of dopaminergic drugs, occlusal disharmonies, and chronic stress on non-functional masticatory activity in the rat, assessed by incisal attrition. Gómez, F.M., *et al.*, 1454
Food properties that influence neuromuscular activity during human mastication. Agrawal, K.R., *et al.*, 1931
Functional properties of jaw and tongue muscles in rats fed a liquid diet after being weaned. Liu, Z.J., *et al.*, 366
Gingival inflammation induced by food and short-chain carboxylic acids. Kashket, S., *et al.*, 412
Reaction strains on the condylar neck during mastication and maximum muscle stimulation in different condylar positions: an experimental study in the miniature pig. Marks, L., *et al.*, 527 *(errata)*, 1412

MASTICATORY FORCE (see Bite Force)

MASTICATORY MUSCLES
Automatic on-line one-channel recognition of masseter activity. Gallo, L.M., *et al.*, 1539
Developmental changes in enzyme activities and in structural features of rat masticatory muscle mitochondria. Sato, I., *et al.*, 1926
Food properties that influence neuromuscular activity during human mastication. Agrawal, K.R., *et al.*, 1931
Functional properties of jaw and tongue muscles in rats fed a liquid diet after being weaned. Liu, Z.J., *et al.*, 366
Psychophysiological assessment of stress in chronic pain: comparisons of stressful stimuli and of response systems. Ohrbach, R., *et al.*, 1840
Riddle of the large loss in bite force after fast jaw-closing movements, The. Slager, G.E.C., *et al.*, 1684

MATRIX, EXTRACELLULAR (see Extracellular Matrix)

MATRIX METALLOPROTEINASES (see Metalloproteinases)

MATRIX PROTEINS (see Extracellular Matrix Proteins)

MECHANORECEPTORS
Alterations in ultrastructural localization of growth-associated protein-43 (GAP-43) in periodontal Ruffini endings of rat molars during experimental tooth movement. Kobayashi, H., *et al.*, 503
Food-holding and -biting behavior in human subjects lacking periodontal receptors. Trulsson, M. and Gunne, H.S.J., 574

MERCURY
Activation of the immune system and sys-

temic immune-complex deposits in Brown Norway rats with dental amalgam restorations. Hultman, P., *et al.*, 1415
Mercury concentrations in urine and whole blood associated with amalgam exposure in a US military population. Kingman, A., *et al.*, 461
Mercury in biological fluids after amalgam removal. Sandborgh-Englund, G., *et al.*, 615
Surface chemistry of a high-copper dental amalgam. McDermott, A.J., *et al.*, 1999

MESSENGER RNA (see RNA, Messenger)

METAL SALTS
Cytotoxicity of dental alloy extracts and corresponding metal salt solutions. Schmalz, G., *et al.*, 1772

METALLOPROTEINASES
Activation and function of host matrix metalloproteinases in dentin matrix breakdown in caries lesions, The. Tjäderhane, L., *et al.*, 1622
Changes in the expression of extracellular matrix (ECM) and matrix metalloproteinases (MMP) of proliferating rat parotid acinar cells. Broverman, R.L., *et al.*, 1504
Enamelysin (matrix metalloproteinase-20): localization in the developing tooth and effects of pH and calcium on amelogenin hydrolysis. Fukae, M., *et al.*, 1580

METHACRYLATES
Effects of various resin composite (co)monomers and extracts on two caries-associated micro-organisms *in vitro*. Hansel, C., *et al.*, 60

N-METHACRYLOYL AMINO ACID
Effects of N-methacryloyl amino acid applications on hybrid layer formation at the interface of intertubular dentin. Suzuki, K., *et al.*, 1881

MICE
Bone morphogenetic protein-7 (osteogenic protein-1, OP-1) and tooth development. Helder, M.N., *et al.*, 545
Cloning, characterization, and tissue expression pattern of mouse tuftelin cDNA. MacDougall, M., *et al.*, 1970
Epithelium-tooth interface—a basal lamina rich in laminin-5 and lacking other known laminin isoforms, The. Hormia, M., *et al.*, 1479
Laminin γ2 expression is developmentally regulated during murine tooth morphogenesis and is intense in ameloblasts. Sahlberg, C., *et al.*, 1589

MICROBIOLOGY
Commensal communism and the oral cavity. Henderson, B. and Wilson, M., 1674

MICROSCOPY, CONFOCAL
Crack propagation directions in unfilled resins. Baran, G., *et al.*, 1864
Interfacial characteristics of resin-modified glass-ionomer materials: a study on fluid permeability using confocal fluorescence microscopy. Sidhu, S.K. and Watson, T.F., 1749

MICROSCOPY, ELECTRON, SCANNING
Mechanical characterization of dental ceramics by Hertzian contacts. Peterson, I.M., *et al.*, 589
Novel organ culture method to study the function of human odontoblasts *in vitro*: gelatinase expression by odontoblasts is differentially regulated by TGF-β1. Tjäderhane, L., *et al.*, 1486
Surface chemistry of a high-copper dental amalgam. McDermott, A.J., *et al.*, 1999
TEM study of two water-based adhesive systems bonded to dry and wet dentin, A. Van Meerbeek, B., *et al.*, 50

MINERALIZATION (see Calcification, Physiologic; Tooth calcification)

MITOCHONDRIA
Developmental changes in enzyme activities and in structural features of rat masticatory muscle mitochondria. Sato, I., *et al.*, 1926

MODELS, THEORETICAL
Crack propagation directions in unfilled resins. Baran, G., *et al.*, 1864
Loading of a unilateral temporomandibular joint prosthesis: a three-dimensional mathematical study. van Loon, J.-P., *et al.*, 1939

MONOMERS
Residual monomer/additive release and variability in cytotoxicity of light-curing glass-ionomer cements and compomers. Geurtsen, W., *et al.*, 2012

MORENO, EDGARD C.
Edgard C. Moreno, PhD: a tribute to his major contributions to oral biology research. Margolis, H.C., 1767

MORPHOMETRIC ANALYSIS
Morphometric analysis of the primary and permanent dentitions in hemifacial microsomia: a controlled study. Kim Seow, W., *et al.*, 27

MOTOR NEURONS
Force vectors of single motor units in a multipennate muscle. Turkawski, S.J.J., *et al.*, 1823
Heteronymous H-reflex in temporal muscle motor units. Macaluso, G.M., *et al.*, 1960

MOUTH
Commensal communism and the oral cavity. Henderson, B. and Wilson, M., 1674
Distribution of fluoride in the oral cavity after application of a bioadhesive fluoride-releasing tablet. Bottenberg, P., *et al.*, 68
Oral streptococci...products of their environment. Burne, R.A., 445

MUCOSA (see Oral Mucosa)

MURAMIDASE
Longitudinal analysis of the association of human salivary antimicrobial agents with caries increment and cariogenic micro-organisms: a two-year cohort study. Kirstilä, V., *et al.*, 73

MUSCLE FIBERS
Force vectors of single motor units in a multipennate muscle. Turkawski, S.J.J., *et al.*, 1823

NADH, NADPH OXIDOREDUCTASES
Developmental changes in enzyme activities and in structural features of rat masticatory muscle mitochondria. Sato, I., *et al.*, 1926

NADPH DEHYDROGENASE
Developmental changes in enzyme activities and in structural features of rat masticatory muscle mitochondria. Sato, I., *et al.*, 1926

NA(+)–K(+)–EXCHANGING ATPASE
Carbachol-induced oxygen consumption in slices from developing rat submandibular and parotid glands. Stojić, D., 1647

NARCOLEPSY
Salivary secretions: narcolepsy and central nervous system stimulants. Nordgarden, H., *et al.*, 1817

NEUTROPHILS
Gingival inflammation induced by food and short-chain carboxylic acids. Kashket, S., *et al.*, 412
HLA-DR alleles are associated with IDDM, but not with impaired neutrophil chemotaxis in IDDM. Gustke, C.J., *et al.*, 1497

NICKEL
Cytotoxicity of dental alloy extracts and corresponding metal salt solutions. Schmalz, G., *et al.*, 1772

NUTRITION
Dr. Robert S. Harris: nutritionist, oral science researcher, and visionary MIT educator. Navia, J.M., 438

ODONTOBLASTS
Circadian rhythms in the incorporation and secretion of ^{3}H-proline by odontoblasts in relation to incremental lines in rat dentin. Ohtsuka, M., *et al.*, 1889
In situ phosphorylation of bone and dentin proteins by the casein kinase II-like enzyme. Suzuki, Y., *et al.*, 1799
Localization of estrogen-receptor-related antigen in human odontoblasts. Hietala, E.-L., *et al.*, 1384
Novel organ culture method to study the function of human odontoblasts *in vitro*: gelatinase expression by odontoblasts is differentially regulated by TGF-β1. Tjäderhane, L., *et al.*, 1486
Potassium and chloride channels in freshly isolated rat odontoblasts. Guo, L. and Davidson, R.M., 341

ODONTOGENESIS
Adenomatous polyposis coli protein is expressed in alternate stages of the ameloblast life cycle. Wang, M., *et al.*, 1979

ODORS
Emotional responses evoked by dental odors: an evaluation from autonomic parameters. Robin, O., *et al.*, 1638

ORAL CAVITY (see Mouth)

ORAL HEALTH
Perceptions of the natural dentition in the context of multiple variables. Gift, H.C., *et al.*, 1529

ORAL MEDICINE
Israel Kleinberg: oral biology north and south. Golub, L.M. and Kaufman, H.W., 1956

ORAL MUCOSA
Commensal communism and the oral cavity. Henderson, B. and Wilson, M., 1674
Toxicity of formaldehyde to human oral fibroblasts and epithelial cells: influences of culture conditions and role of thiol status. Nilsson, J.A., *et al.*, 1896

ORGAN CULTURE
Novel organ culture method to study the function of human odontoblasts *in vitro*: gelatinase expression by odontoblasts is differentially regulated by TGF-β1. Tjäderhane, L., *et al.*, 1486

OSTEOARTHRITIS
Natural course of untreated symptomatic temporomandibular joint disc displacement without reduction. Kurita, K., *et al.*, 361

OSTEOBLASTS
Expression of transforming growth factor-beta 1 (TGF-β1) in the developing periodontium of rats. Gao, J., *et al.*, 1708
RGD peptides regulate the specific adhesion scheme of osteoblasts to hydroxyapatite but not to titanium. Okamoto, K., *et al.*, 481

OSTEOCLASTS
Inhibition of tooth eruption in the rat by a bisphosphonate. Grier, R.L. and Wise, G.E., 8
Threshold for bone resorption induced by continuous and intermittent pressure in the rat hard palate. Sato, T., *et al.*, 387

OSTEOGENESIS
Continuous administration of basic fibroblast growth factor (FGF-2) accelerates bone induction on rat calvaria—an application of a new drug delivery system. Kimoto, T., *et al.*, 1965

OVERDENTURES (see Denture, Overlay)

OXIDATION
Modification of amino acid residues in carious dentin matrix. Kleter, G.A., *et al.*, 488

OXYGEN CONSUMPTION
Carbachol-induced oxygen consumption in slices from developing rat submandibular and parotid glands. Stojić, D., 1647

PAIN
Expression of fos in the fat forebrain following experimental tooth movement. Yamashiro, T., *et al.*, 1920
Pain maps from facial pain patients indicate a broad pain geography. Türp, J.C., *et al.*, 1465
Psychophysiological assessment of stress in chronic pain: comparisons of stressful stimuli and of response systems. Ohrbach, R., *et al.*, 1840

PALATE
Diphenylhydantoin affects glycosaminoglycans and collagen production by human fibroblasts from cleft palate patients. Bosi, G., *et al.*, 1613
Threshold for bone resorption induced by continuous and intermittent pressure in the rat hard palate. Sato, T., *et al.*, 387

PAMIDRONATE
Inhibition of tooth eruption in the rat by a bisphosphonate. Grier, R.L. and Wise, G.E., 8

PARAVENTRICULAR HYPOTHALAMIC NUCLEUS
Expression of fos in the fat forebrain following experimental tooth movement. Yamashiro, T., *et al.*, 1920

PAROTID GLAND
Carbachol-induced oxygen consumption in slices from developing rat submandibular and parotid glands. Stojić, D., 1647
Changes in the expression of extracellular matrix (ECM) and matrix metalloproteinases (MMP) of proliferating rat parotid acinar cells. Broverman, R.L., *et al.*, 1504
Cyclic ADP-ribose induces Ca^{2+} release from caffeine-insensitive Ca^{2+} pools in canine salivary gland cells. Yamaki, H., *et al.*, 1807

PATTERN RECOGNITION
Automatic on-line one-channel recognition of masseter activity. Gallo, L.M., *et al.*, 1539

PELLETS, DRUG
(see Drug Delivery Systems)

PEPTIDE PEPTIDOHYDROLASES
Purification, characterization, and cloning of enamel matrix serine proteinase 1. Simmer, J.P., *et al.*, 377
Submandibular salivary proteases: lack of a role in anti-HIV activity. Kennedy, S., *et al.*, 1515

PEPTIDES
RGD peptides regulate the specific adhesion scheme of osteoblasts to hydroxyapatite but not to titanium. Okamoto, K., *et al.*, 481
Synthetic integrin-binding peptides promote adhesion and proliferation of human periodontal ligament cells *in vitro*. Grzesik, W.J., *et al.*, 1606

PERIODONTAL DISEASES
Commensal communism and the oral cavity. Henderson, B. and Wilson, M., 1674
Cytokine profiles of cells extracted from humans with periodontal disease. Gemmell, E. and Seymour, G.J., 16
Guest editorial: probing the depths: the promise and pitfalls of periodontal diagnostics. Barnett, M.L., 436

PERIODONTAL LIGAMENT
Alterations in ultrastructural localization of growth-associated protein-43 (GAP-43) in periodontal Ruffini endings of rat molars during experimental tooth movement. Kobayashi, H., *et al.*, 503
Attachment formation following replantation of cultured cells into periodontal defects—a study in minipigs. Lang, H., *et al.*, 393
Autoregulation of periodontal ligament cell phenotype and functions by transforming growth factor-β1. Brady, T.A., *et al.*, 1779
cDNA cloning of S100 calcium-binding proteins from bovine periodontal ligament and their expression in oral tissues. Duarte, W.R., *et al.*, 1694
Expression of transforming growth factor-

beta 1 (TGF-β1) in the developing periodontium of rats. Gao, J., *et al.*, 1708
Flow cytometry analysis of gingival and periodontal ligament cells. Kuru, L., *et al.*, 555
Food-holding and -biting behavior in human subjects lacking periodontal receptors. Trulsson, M. and Gunne, H.S.J., 574
PDGF-α receptor subunit expression downregulated by IL-1β in human periodontal ligament cells. Oates, T.W., *et al.*, 1791
Synthetic integrin-binding peptides promote adhesion and proliferation of human periodontal ligament cells *in vitro*. Grzesik, W.J., *et al.*, 1606

PERIODONTITIS
Abnormally high levels of cystatin S in submandibular glands, saliva, and gingiva of plaque-resistant rats. Abe, K., *et al.*, 1913
Cytokine profiles of cells extracted from humans with periodontal disease. Gemmell, E. and Seymour, G.J., 16
Guest editorial: casual or causal relationship between periodontal infection and non-oral disease? Slots, J., 1764
HLA-DR alleles are associated with IDDM, but not with impaired neutrophil chemotaxis in IDDM. Gustke, C.J., *et al.*, 1497
Pharmacokinetic and safety evaluations of ketoprofen gels in subjects with adult periodontitis. Lawrence, H.P., *et al.*, 1904
Serum or growth factor deprivation induces the expression of alkaline phosphatase in human gingival fibroblasts. Abe, T., *et al.*, 1700

PERIODONTIUM
Attachment formation following replantation of cultured cells into periodontal defects—a study in minipigs. Lang, H., *et al.*, 393
Cytotoxicity of dental alloy extracts and corresponding metal salt solutions. Schmalz, G., *et al.*, 1772
Expression of transforming growth factor-beta 1 (TGF-β1) in the developing periodontium of rats. Gao, J., *et al.*, 1708
Gingival inflammation induced by food and short-chain carboxylic acids. Kashket, S., *et al.*, 412

PERMEABILITY
Interfacial characteristics of resin-modified glass-ionomer materials: a study on fluid permeability using confocal fluorescence microscopy. Sidhu, S.K. and Watson, T.F., 1749

pH (see Hydrogen-Ion Concentration)

PHAGOCYTOSIS
"*In vitro*" dissolution of coral in peritoneal or fibroblast cell cultures. Fricain, J.-Ch., *et al.*, 406

PHENYTOIN
Diphenylhydantoin affects glycosaminoglycans and collagen production by human fibroblasts from cleft palate patients. Bosi, G., *et al.*, 1613

PHOSPHOENOLPYRUVATE: SUGAR PHOSPHOTRANSFERASE SYSTEM
Oral streptococci...products of their environment. Burne, R.A., 445

PHOSPHORIC DIESTER HYDROLASES
Gustducin and its role in taste. Spielman, A.I., 539

PHOSPHORUS
Potassium is involved in apatite biomineralization. Wiesmann, H.-P., *et al.*, 1654

PHOSPHOSERINE
In situ phosphorylation of bone and dentin proteins by the casein kinase II-like enzyme. Suzuki, Y., *et al.*, 1799

PHOSPHOTRANSFERASES
In situ phosphorylation of bone and dentin proteins by the casein kinase II-like enzyme. Suzuki, Y., *et al.*, 1799

PIGS (see Swine)

PLATELET-DERIVED GROWTH FACTOR
PDGF-α receptor subunit expression downregulated by IL-1β in human periodontal ligament cells. Oates, T.W., *et al.*, 1791
Serum or growth factor deprivation induces the expression of alkaline phosphatase in human gingival fibroblasts. Abe, T., *et al.*, 1700

POLYMERIZATION CONTRACTION
Distortion behavior of heat-activated acrylic denture-base resin in conventional and long, low-temperature processing methods. Kawara, M., *et al.*, 1446
Do dental composites always shrink toward the light? Versluis, A., *et al.*, 1435
Elements of light-cured epoxy-based dental polymer systems. Millich, F., *et al.*, 603

POLYMORPHISM
Commensal communism and the oral cavity. Henderson, B. and Wilson, M., 1674

POLYSACCHARIDES
Oral streptococci...products of their environment. Burne, R.A., 445

POLYSOMNOGRAPHY
Sleep bruxism is a disorder related to periodic arousals during sleep. Macaluso, G.M., *et al.*, 565

PORCELAIN (see Dental Porcelain)

PORPHYROMONAS GINGIVALIS
Cytokine profiles of cells extracted from humans with periodontal disease. Gemmell, E. and Seymour, G.J., 16

POTASSIUM
Potassium is involved in apatite biomineralization. Wiesmann, H.-P., *et al.*, 1654

POTASSIUM CHANNELS
Potassium and chloride channels in freshly isolated rat odontoblasts. Guo, L. and Davidson, R.M., 341

PRESSURE
Threshold for bone resorption induced by continuous and intermittent pressure in the rat hard palate. Sato, T., *et al.*, 387

PRESYNAPTIC TERMINALS
Alterations in ultrastructural localization of growth-associated protein-43 (GAP-43) in periodontal Ruffini endings of rat molars during experimental tooth movement. Kobayashi, H., *et al.*, 503

PREVOTELLA INTERMEDIA
Dual regulatory effects of interferon-α, -β, and γ on interleukin-8 gene expression by human gingival fibroblasts in culture upon stimulation with lipopolysaccharide from *Prevotella intermedia*, interleukin-1α, or tumor necrosis factor-α. Sakuta, T., *et al.*, 1597

PROLINE
Circadian rhythms in the incorporation and secretion of ^{3}H-proline by odontoblasts in relation to incremental lines in rat dentin. Ohtsuka, M., *et al.*, 1889

PROLINE-RICH PROTEINS
Agglutinin and acidic proline-rich protein receptor patterns may modulate bacterial adherence and colonization on tooth surfaces. Carlén, A., *et al.*, 81
Salivary secretions: narcolepsy and central nervous system stimulants. Nordgarden, H., *et al.*, 1817

PROSTHESIS DESIGN
Loading of a unilateral temporomandibular joint prosthesis: a three-dimensional mathematical study. van Loon, J.-P., *et al.*, 1939

PROTEASE INHIBITORS
Changes in the expression of extracellular matrix (ECM) and matrix metalloproteinases (MMP) of proliferating rat parotid acinar cells. Broverman, R.L., *et al.*, 1504
Submandibular salivary proteases: lack of a role in anti-HIV activity. Kennedy, S., *et*

al., 1515

PROTEIN SYNTHESIS
Synthetic integrin-binding peptides promote adhesion and proliferation of human periodontal ligament cells *in vitro*. Grzesik, W.J., *et al.*, 1606

PROTEINASES
(see Peptide Peptidohydrolases)

PROTEOGLYCANS
Proteoglycan expression in the rat temporomandibular joint in response to unilateral bite raise. Mao, J.J., *et al.*, 1520

PSYCHOPHYSIOLOGY
Psychophysiological assessment of stress in chronic pain: comparisons of stressful stimuli and of response systems. Ohrbach, R., *et al.*, 1840

PULP CHAMBER (see Dental Pulp Cavity)

RABBITS
Force vectors of single motor units in a multipennate muscle. Turkawski, S.J.J., *et al.*, 1823

RATS
Abnormally high levels of cystatin S in submandibular glands, saliva, and gingiva of plaque-resistant rats. Abe, K., *et al.*, 1913
Activation of the immune system and systemic immune-complex deposits in Brown Norway rats with dental amalgam restorations. Hultman, P., *et al.*, 1415
Adenomatous polyposis coli protein is expressed in alternate stages of the ameloblast life cycle. Wang, M., *et al.*, 1979
Alterations in ultrastructural localization of growth-associated protein-43 (GAP-43) in periodontal Ruffini endings of rat molars during experimental tooth movement. Kobayashi, H., *et al.*, 503
Bone morphogenetic protein-7 (osteogenic protein-1, OP-1) and tooth development. Helder, M.N., *et al.*, 545
Carbachol-induced oxygen consumption in slices from developing rat submandibular and parotid glands. Stojić, D., 1647
Changes in the expression of extracellular matrix (ECM) and matrix metalloproteinases (MMP) of proliferating rat parotid acinar cells. Broverman, R.L., *et al.*, 1504
Circadian rhythms in the incorporation and secretion of ^{3}H-proline by odontoblasts in relation to incremental lines in rat dentin. Ohtsuka, M., *et al.*, 1889
Continuous administration of basic fibroblast growth factor (FGF-2) accelerates bone induction on rat calvaria—an application of a new drug delivery system. Kimoto, T., *et al.*, 1965
Developmental changes in enzyme activities and in structural features of rat masticatory muscle mitochondria. Sato, I., *et al.*, 1926
Effects of dopaminergic drugs, occlusal disharmonies, and chronic stress on non-functional masticatory activity in the rat, assessed by incisal attrition. Gómez, F.M., *et al.*, 1454
Epithelium-tooth interface—a basal lamina rich in laminin-5 and lacking other known laminin isoforms, The. Hormia, M., *et al.*, 1479
Expression of fos in the fat forebrain following experimental tooth movement. Yamashiro, T., *et al.*, 1920
Expression of transforming growth factor-beta 1 (TGF-β1) in the developing periodontium of rats. Gao, J., *et al.*, 1708
Functional properties of jaw and tongue muscles in rats fed a liquid diet after being weaned. Liu, Z.J., *et al.*, 366
Inhibition of tooth eruption in the rat by a bisphosphonate. Grier, R.L. and Wise, G.E., 8
In situ phosphorylation of bone and dentin proteins by the casein kinase II-like enzyme. Suzuki, Y., *et al.*, 1799
Potassium and chloride channels in freshly isolated rat odontoblasts. Guo, L. and Davidson, R.M., 341
Potassium is involved in apatite biomineralization. Wiesmann, H.-P., *et al.*, 1654
Proteoglycan expression in the rat temporomandibular joint in response to unilateral bite raise. Mao, J.J., *et al.*, 1520
Threshold for bone resorption induced by continuous and intermittent pressure in the rat hard palate. Sato, T., *et al.*, 387

READING FRAMES
Cloning, characterization, and tissue expression pattern of mouse tuftelin cDNA. MacDougall, M., *et al.*, 1970

RECEPTORS, ESTROGEN
Localization of estrogen-receptor-related antigen in human odontoblasts. Hietala, E.-L., *et al.*, 1384

RECEPTORS, PLATELET-DERIVED GROWTH FACTOR
PDGF-α receptor subunit expression down-regulated by IL-1β in human periodontal ligament cells. Oates, T.W., *et al.*, 1791

REFLEX
Heteronymous H-reflex in temporal muscle motor units. Macaluso, G.M., *et al.*, 1960

REPLANTATION
Attachment formation following replantation of cultured cells into periodontal defects—a study in minipigs. Lang, H., *et al.*, 393

RESEARCH
Advancing dental research in the 21st century. Sakuda, M., 1668
Edgard C. Moreno, PhD: a tribute to his major contributions to oral biology research. Margolis, H.C., 1767
Road to pulp biology research: a personal odyssey, The. Stanley, H.R., 1670

RESIN-BONDED BRIDGES (see Denture, Partial, Fixed, Resin-Bonded)

RESIN COMPOSITES (see Composites)

RESINS
Crack propagation directions in unfilled resins. Baran, G., *et al.*, 1864
Distortion behavior of heat-activated acrylic denture-base resin in conventional and long, low-temperature processing methods. Kawara, M., *et al.*, 1446
Effect of heating delay on conversion and strength of a post-cured resin composite. Loza-Herrero, M.A., *et al.*, 426
Effects of N-methacryloyl amino acid applications on hybrid layer formation at the interface of intertubular dentin. Suzuki, K., *et al.*, 1881
Effects of various resin composite (co)monomers and extracts on two caries-associated micro-organisms *in vitro*. Hansel, C., *et al.*, 60
Elements of light-cured epoxy-based dental polymer systems. Millich, F., *et al.*, 603
Interfacial characteristics of resin-modified glass-ionomer materials: a study on fluid permeability using confocal fluorescence microscopy. Sidhu, S.K. and Watson, T.F., 1749
Residual monomer/additive release and variability in cytotoxicity of light-curing glass-ionomer cements and compomers. Geurtsen, W., *et al.*, 2012
Structural integrity of resin-modified glass ionomers as affected by the delay or omission of light activation. de Gee, A.J., *et al.*, 1658
TEM study of two water-based adhesive systems bonded to dry and wet dentin, A. Van Meerbeek, B., *et al.*, 50

RHEOLOGY
Rheological properties of elastomeric impression materials before and during setting. McCabe, J.F. and Arikawa, H., 1874

RNA, MESSENGER
Autoregulation of periodontal ligament cell phenotype and functions by transforming growth factor-β1. Brady, T.A., *et al.*, 1779

ROOT CARIES
Comparison between Er:YAG laser and conventional technique for root caries treatment *in vitro*. Aoki, A., *et al.*, 1404

Effects of aged fluoride-containing restorative materials on recurrent root caries. Hsu, C.-Y.S., *et al.*, 418

RUBBER

Rheological properties of elastomeric impression materials before and during setting. McCabe, J.F. and Arikawa, H., 1874

RUBIDIUM

Effect of ion exchange on the microstructure, strength, and thermal expansion behavior of a leucite-reinforced porcelain. Denry, I.L., *et al.*, 583

RUFFINI ENDINGS (see Mechanoreceptors)

RYANODINE

Cyclic ADP-ribose induces Ca^{2+} release from caffeine-insensitive Ca^{2+} pools in canine salivary gland cells. Yamaki, H., *et al.*, 1807

SALIVA

Abnormally high levels of cystatin S in submandibular glands, saliva, and gingiva of plaque-resistant rats. Abe, K., *et al.*, 1913

Activation and function of host matrix metalloproteinases in dentin matrix breakdown in caries lesions, The. Tjäderhane, L., *et al.*, 1622

Composition of plaque and saliva following a sucrose challenge and use of an α-tricalcium-phosphate-containing chewing gum. Vogel, G.L., *et al.*, 518, 1575 *(erratum)*

Distribution of fluoride in the oral cavity after application of a bioadhesive fluoride-releasing tablet. Bottenberg, P., *et al.*, 68

Longitudinal analysis of the association of human salivary antimicrobial agents with caries increment and cariogenic micro-organisms: a two-year cohort study. Kirstilä, V., *et al.*, 73

Submandibular salivary proteases: lack of a role in anti-HIV activity. Kennedy, S., *et al.*, 1515

Wear of human enamel: a quantitative *in vitro* assessment. Kaidonis, J.A., *et al.*, 1983

SALIVARY GLANDS

Abnormally high levels of cystatin S in submandibular glands, saliva, and gingiva of plaque-resistant rats. Abe, K., *et al.*, 1913

Carbachol-induced oxygen consumption in slices from developing rat submandibular and parotid glands. Stojić, D., 1647

Changes in the expression of extracellular matrix (ECM) and matrix metalloproteinases (MMP) of proliferating rat parotid acinar cells. Broverman, R.L., *et al.*, 1504

Charlotte Schneyer: pioneer in salivary gland research. Hall, H.D., 1476

Cyclic ADP-ribose induces Ca^{2+} release from caffeine-insensitive Ca^{2+} pools in canine salivary gland cells. Yamaki, H., *et al.*, 1807

Submandibular salivary proteases: lack of a role in anti-HIV activity. Kennedy, S., *et al.*, 1515

SALIVARY PROTEINS

Agglutinin and acidic proline-rich protein receptor patterns may modulate bacterial adherence and colonization on tooth surfaces. Carlén, A., *et al.*, 81

Salivary secretions: narcolepsy and central nervous system stimulants. Nordgarden, H., *et al.*, 1817

SARCOMERES

Riddle of the large loss in bite force after fast jaw-closing movements, The. Slager, G.E.C., *et al.*, 1684

SCHNEYER, CHARLOTTE A.

Charlotte Schneyer: pioneer in salivary gland research. Hall, H.D., 1476

SCHWANN CELLS

Alterations in ultrastructural localization of growth-associated protein-43 (GAP-43) in periodontal Ruffini endings of rat molars during experimental tooth movement. Kobayashi, H., *et al.*, 503

SEQUENCE ANALYSIS, DNA

Cloning, characterization, and tissue expression pattern of mouse tuftelin cDNA. MacDougall, M., *et al.*, 1970

Purification, characterization, and cloning of enamel matrix serine proteinase 1. Simmer, J.P., *et al.*, 377

SERINE PROTEINASES

Purification, characterization, and cloning of enamel matrix serine proteinase 1. Simmer, J.P., *et al.*, 377

SHRINKAGE (see Contraction; Polymerization Contraction)

SIGNAL TRANSDUCTION

Commensal communism and the oral cavity. Henderson, B. and Wilson, M., 1674

Gustducin and its role in taste. Spielman, A.I., 539

SILANES

Reactivity of fluoride-containing calcium aluminosilicate glasses used in dental glass-ionomer cements. De Maeyer, E.A.P., *et al.*, 2005

SILICONE ELASTOMERS

Rheological properties of elastomeric impression materials before and during setting. McCabe, J.F. and Arikawa, H., 1874

SILVER

Activation of the immune system and systemic immune-complex deposits in Brown Norway rats with dental amalgam restorations. Hultman, P., *et al.*, 1415

Cytotoxicity of dental alloy extracts and corresponding metal salt solutions. Schmalz, G., *et al.*, 1772

Indentation creep behavior of a direct-filling silver alternative to amalgam. Xu, H.H.K., *et al.*, 1991

SKIN

Morphometric studies of collagen and fibrin lattices contracted by human gingival fibroblasts; comparison with dermal fibroblasts. Lorimier, S., *et al.*, 1717

SKULL

Continuous administration of basic fibroblast growth factor (FGF-2) accelerates bone induction on rat calvaria—an application of a new drug delivery system. Kimoto, T., *et al.*, 1965

SLEEP DISORDERS

Sleep bruxism is a disorder related to periodic arousals during sleep. Macaluso, G.M., *et al.*, 565

SOFTWARE

Software support for clinical studies: review of nQuery Advisor® Release 2.0. Hodges, J.S. and Pihlstrom, B.L., 525

SOLUBILITY

"In vitro" dissolution of coral in peritoneal or fibroblast cell cultures. Fricain, J.-Ch., *et al.*, 406

Process of physical weakening and dissolution of the HA-coated implant in bone and soft tissue, The. Ogiso, M., *et al.*, 1426

Quantitative analysis of amelogenin solubility. Tan, J., *et al.*, 1388

SORBITOL

Effects of xylitol-containing chewing gums on dental plaque and acidogenic potential, The. Scheie, A.Aa., *et al.*, 1547

SPECTROMETRY, X-RAY EMISSION

Surface chemistry of a high-copper dental amalgam. McDermott, A.J., *et al.*, 1999

SPECTRUM ANALYSIS

Residual monomer/additive release and variability in cytotoxicity of light-curing glass-ionomer cements and compomers. Geurtsen, W., *et al.*, 2012

Surface chemistry of a high-copper dental amalgam. McDermott, A.J., *et al.*, 1999

STATHERINS
Salivary secretions: narcolepsy and central nervous system stimulants. Nordgarden, H., *et al.*, 1817

STATISTICS
Forty-five-year tooth survival probabilities among men in Oslo, Norway. Hujoel, P.P., *et al.*, 2020

STRENGTH (see Tensile Strength)

STREPTOCOCCUS MUTANS
Activation and function of host matrix metalloproteinases in dentin matrix breakdown in caries lesions, The. Tjäderhane, L., *et al.*, 1622
Agglutinin and acidic proline-rich protein receptor patterns may modulate bacterial adherence and colonization on tooth surfaces. Carlén, A., *et al.*, 81
Colonization with mutans streptococci and lactobacilli and the caries experience of children after the age of five. Straetemans, M.M.E., *et al.*, 1851
Effects of aged fluoride-containing restorative materials on recurrent root caries. Hsu, C.-Y.S., *et al.*, 418
Longitudinal analysis of the association of human salivary antimicrobial agents with caries increment and cariogenic micro-organisms: a two-year cohort study. Kirstilä, V., *et al.*, 73
Oral streptococci...products of their environment. Burne, R.A., 445

STREPTOCOCCUS SOBRINUS
Activation and function of host matrix metalloproteinases in dentin matrix breakdown in caries lesions, The. Tjäderhane, L., *et al.*, 1622
Effects of various resin composite (co)monomers and extracts on two caries-associated micro-organisms *in vitro*. Hansel, C., *et al.*, 60

STRESS, MECHANICAL
Autoregulation of periodontal ligament cell phenotype and functions by transforming growth factor-β1. Brady, T.A., *et al.*, 1779
Crack propagation directions in unfilled resins. Baran, G., *et al.*, 1864

STRESS, PSYCHOLOGICAL
Effects of dopaminergic drugs, occlusal disharmonies, and chronic stress on non-functional masticatory activity in the rat, assessed by incisal attrition. Gómez, F.M., *et al.*, 1454
Psychophysiological assessment of stress in chronic pain: comparisons of stressful stimuli and of response systems. Ohrbach, R., *et al.*, 1840

SUBMANDIBULAR GLAND
Abnormally high levels of cystatin S in submandibular glands, saliva, and gingiva of plaque-resistant rats. Abe, K., *et al.*, 1913
Carbachol-induced oxygen consumption in slices from developing rat submandibular and parotid glands. Stojić, D., 1647
Cyclic ADP-ribose induces Ca^{2+} release from caffeine-insensitive Ca^{2+} pools in canine salivary gland cells. Yamaki, H., *et al.*, 1807
Submandibular salivary proteases: lack of a role in anti-HIV activity. Kennedy, S., *et al.*, 1515

SUCCINATE CYTOCHROME C OXIDOREDUCTASES
Developmental changes in enzyme activities and in structural features of rat masticatory muscle mitochondria. Sato, I., *et al.*, 1926

SUCCINATE DEHYDROGENASE
Developmental changes in enzyme activities and in structural features of rat masticatory muscle mitochondria. Sato, I., *et al.*, 1926

SUCROSE
Composition of plaque and saliva following a sucrose challenge and use of an α-tricalcium-phosphate-containing chewing gum. Vogel, G.L., *et al.*, 518, 1575 *(erratum)*

SULFHYDRYL COMPOUNDS
Toxicity of formaldehyde to human oral fibroblasts and epithelial cells: influences of culture conditions and role of thiol status. Nilsson, J.A., *et al.*, 1896

SURAMIN
Serum or growth factor deprivation induces the expression of alkaline phosphatase in human gingival fibroblasts. Abe, T., *et al.*, 1700

SURFACE PROPERTIES
Surface chemistry of a high-copper dental amalgam. McDermott, A.J., *et al.*, 1999

SURVIVAL ANALYSIS
Five-year multi-practice clinical study on posterior resin-bonded bridges, A. De Kanter, R.J.A.M., *et al.*, 609
Forty-five-year tooth survival probabilities among men in Oslo, Norway. Hujoel, P.P., *et al.*, 2020
Long-term survival of extensive amalgam restorations. Plasmans, P.J.J.M., *et al.*, 453

SWALLOWING (see Deglutition)

SWINE
Attachment formation following replantation of cultured cells into periodontal defects—a study in minipigs. Lang, H., *et al.*, 393

T-LYMPHOCYTES
Cytokine profiles of cells extracted from humans with periodontal disease. Gemmell, E. and Seymour, G.J., 16

TASTE
Gustducin and its role in taste. Spielman, A.I., 539

TEGDMA (see Triethylene Glycol Dimethacrylate)

TEMPERATURE
Gingival inflammation induced by food and short-chain carboxylic acids. Kashket, S., *et al.*, 412

TEMPORAL MUSCLE
Food properties that influence neuromuscular activity during human mastication. Agrawal, K.R., *et al.*, 1931
Heteronymous H-reflex in temporal muscle motor units. Macaluso, G.M., *et al.*, 1960

TEMPOROMANDIBULAR JOINT
Loading of a unilateral temporomandibular joint prosthesis: a three-dimensional mathematical study. van Loon, J.-P., *et al.*, 1939
Proteoglycan expression in the rat temporomandibular joint in response to unilateral bite raise. Mao, J.J., *et al.*, 1520

TEMPOROMANDIBULAR JOINT DISK
Natural course of untreated symptomatic temporomandibular joint disc displacement without reduction. Kurita, K., *et al.*, 361

TEMPOROMANDIBULAR JOINT DYSFUNCTION SYNDROME
Psychophysiological assessment of stress in chronic pain: comparisons of stressful stimuli and of response systems. Ohrbach, R., *et al.*, 1840

TENASCIN
Flow cytometry analysis of gingival and periodontal ligament cells. Kuru, L., *et al.*, 555

TENSILE STRENGTH
Effect of heating delay on conversion and strength of a post-cured resin composite. Loza-Herrero, M.A., *et al.*, 426
Effect of ion exchange on the microstructure, strength, and thermal expansion behavior of a leucite-reinforced porcelain. Denry, I.L., *et al.*, 583
Mechanical characterization of dental ceramics by Hertzian contacts. Peterson, I.M., *et al.*, 589

Mechanical properties of hydroxyapatite and OH-carbonated hydroxyapatite single crystals. Teraoka, K., *et al.*, 1560

TH1 CELLS
Cytokine profiles of cells extracted from humans with periodontal disease. Gemmell, E. and Seymour, G.J., 16

TH2 CELLS
Cytokine profiles of cells extracted from humans with periodontal disease. Gemmell, E. and Seymour, G.J., 16

THALAMUS
Expression of fos in the fat forebrain following experimental tooth movement. Yamashiro, T., *et al.*, 1920

THERMAL EXPANSION
Effect of ion exchange on the microstructure, strength, and thermal expansion behavior of a leucite-reinforced porcelain. Denry, I.L., *et al.*, 583

THIOCYANATES
Longitudinal analysis of the association of human salivary antimicrobial agents with caries increment and cariogenic micro-organisms: a two-year cohort study. Kirstilä, V., *et al.*, 73

THIOLS (see Sulfhydryl Compounds)

TITANIUM
Process of physical weakening and dissolution of the HA-coated implant in bone and soft tissue, The. Ogiso, M., *et al.*, 1426
RGD peptides regulate the specific adhesion scheme of osteoblasts to hydroxyapatite but not to titanium. Okamoto, K., *et al.*, 481

TONGUE
Functional properties of jaw and tongue muscles in rats fed a liquid diet after being weaned. Liu, Z.J., *et al.*, 366

TOOTH
Agglutinin and acidic proline-rich protein receptor patterns may modulate bacterial adherence and colonization on tooth surfaces. Carlén, A., *et al.*, 81
Bone morphogenetic protein-7 (osteogenic protein-1, OP-1) and tooth development. Helder, M.N., *et al.*, 545
Epithelium-tooth interface—a basal lamina rich in laminin-5 and lacking other known laminin isoforms, The. Hormia, M., *et al.*, 1479
Finite element study of ultrasonic wave propagation in a tooth phantom, A. Ghorayeb, S.R., *et al.*, 39

TOOTH ABNORMALITIES
Morphometric analysis of the primary and permanent dentitions in hemifacial microsomia: a controlled study. Kim Seow, W., *et al.*, 27

TOOTH ABRASION
Anthropology, tooth wear, and occlusion *ab origine*. Young, W.G., 1860
Wear of human enamel: a quantitative *in vitro* assessment. Kaidonis, J.A., *et al.*, 1983

TOOTH ATTRITION
Effects of dopaminergic drugs, occlusal disharmonies, and chronic stress on non-functional masticatory activity in the rat, assessed by incisal attrition. Gómez, F.M., *et al.*, 1454

TOOTH CALCIFICATION
Potassium is involved in apatite biomineralization. Wiesmann, H.-P., *et al.*, 1654

TOOTH ERUPTION
Biology of tooth eruption, The. Wise, G.E., 1576
Inhibition of tooth eruption in the rat by a bisphosphonate. Grier, R.L. and Wise, G.E., 8

TOOTH FRACTURES
Indentation damage and mechanical properties of human enamel and dentin. Xu, H.H.K., *et al.*, 472
Wear of human enamel: a quantitative *in vitro* assessment. Kaidonis, J.A., *et al.*, 1983

TOOTH GERM
Bone morphogenetic protein-7 (osteogenic protein-1, OP-1) and tooth development. Helder, M.N., *et al.*, 545
Relationship between growth and the pattern of tooth initiation in alligator embryos. Osborn, J.W., 1730

TOOTH LOSS
Forty-five-year tooth survival probabilities among men in Oslo, Norway. Hujoel, P.P., *et al.*, 2020

TOOTH MOVEMENT
Alterations in ultrastructural localization of growth-associated protein-43 (GAP-43) in periodontal Ruffini endings of rat molars during experimental tooth movement. Kobayashi, H., *et al.*, 503
Autoregulation of periodontal ligament cell phenotype and functions by transforming growth factor-β1. Brady, T.A., *et al.*, 1779
Expression of fos in the fat forebrain following experimental tooth movement. Yamashiro, T., *et al.*, 1920

TOOTH ROOT CARIES (see Root Caries)

TRANSDUCERS
Force vectors of single motor units in a multipennate muscle. Turkawski, S.J.J., *et al.*, 1823

TRANSFORMING GROWTH FACTOR BETA
Autoregulation of periodontal ligament cell phenotype and functions by transforming growth factor-β1. Brady, T.A., *et al.*, 1779
Expression of transforming growth factor-beta 1 (TGF-β1) in the developing periodontium of rats. Gao, J., *et al.*, 1708
Novel organ culture method to study the function of human odontoblasts *in vitro*: gelatinase expression by odontoblasts is differentially regulated by TGF-β1. Tjäderhane, L., *et al.*, 1486

TRIETHYLENE GLYCOL DIMETHACRYLATE
Effects of various resin composite (co)monomers and extracts on two caries-associated micro-organisms *in vitro*. Hansel, C., *et al.*, 60
Residual monomer/additive release and variability in cytotoxicity of light-curing glass-ionomer cements and compomers. Geurtsen, W., *et al.*, 2012

TRIGEMINAL NERVE
Pain maps from facial pain patients indicate a broad pain geography. Türp, J.C., *et al.*, 1465

TUFTELIN
Cloning, characterization, and tissue expression pattern of mouse tuftelin cDNA. MacDougall, M., *et al.*, 1970

TUMOR NECROSIS FACTOR
Dual regulatory effects of interferon-α, -β, and γ on interleukin-8 gene expression by human gingival fibroblasts in culture upon stimulation with lipopolysaccharide from *Prevotella intermedia*, interleukin-1α, or tumor necrosis factor-α. Sakuta, T., *et al.*, 1597

ULTRASONOGRAPHY
Finite element study of ultrasonic wave propagation in a tooth phantom, A. Ghorayeb, S.R., *et al.*, 39

UREA
Effect of three months' frequent use of sugar-free chewing gum with and without urea on calculus formation. Fure, *et al.*, 1630

URINE
Mercury concentrations in urine and whole blood associated with amalgam expo-

sure in a US military population. Kingman, A., *et al.*, 461
Mercury in biological fluids after amalgam removal. Sandborgh-Englund, G., *et al.*, 615

WEAR
(see Dental Restoration Wear; Tooth Abrasion)

WOUND HEALING
Attachment formation following replantation of cultured cells into periodontal defects—a study in minipigs. Lang, H., *et al.*, 393
Morphometric studies of collagen and fibrin lattices contracted by human gingival fibroblasts; comparison with dermal fibroblasts. Lorimier, S., *et al.*, 1717

X-RAY DIFFRACTION
Effect of ion exchange on the microstructure, strength, and thermal expansion behavior of a leucite-reinforced porcelain. Denry, I.L., *et al.*, 583

XYLITOL
Effects of xylitol-containing chewing gums on dental plaque and acidogenic potential, The. Scheie, A.Aa., *et al.*, 1547

ZINC
Cytotoxicity of dental alloy extracts and corresponding metal salt solutions. Schmalz, G., *et al.*, 1772
